

GERBER

SPORTSMEN'S KNIVES

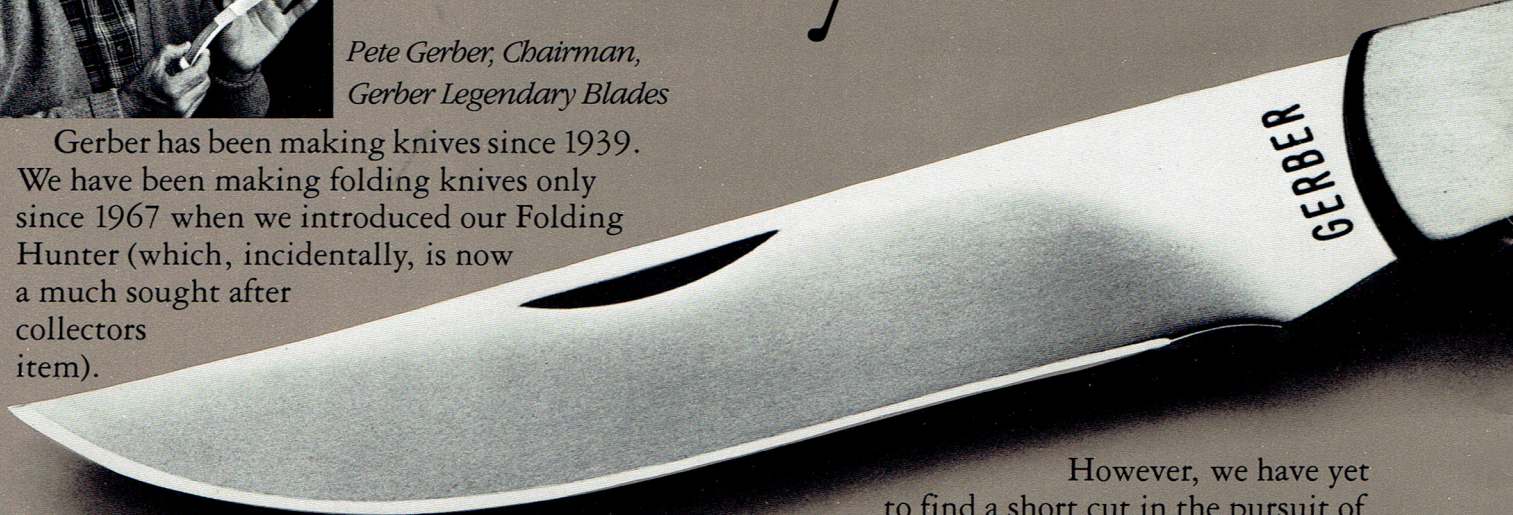

"When it comes to making knives, I make my own rules."

*Pete Gerber, Chairman,
Gerber Legendary Blades*

Gerber has been making knives since 1939. We have been making folding knives only since 1967 when we introduced our Folding Hunter (which, incidentally, is now a much sought after collectors item).

As a relatively newcomer to the manufacturing of folding knives, we have not been doing things as they have historically been done. Rather, we have pioneered new materials (all made in the U.S.A.), processes, and machines to make "state of the art" folding knives — the very finest available today.

However, we have yet to find a short cut in the pursuit of genuine excellence; so we continue making liberal use of an old fashioned but highly effective device — the human hand.^{††}

Where brass or steel wire has always been considered the norm for rivets, Gerber uses precision machined pins for smoother operation and greater holding power. Many of our folding knife blades pivot on "lubricated-for-life" bearings. Our Bolt Action™ and LST®

FOLDING SPORTSMAN KNIVES Made in U.S.A.

Six elegant knives: Four Folding Sportsmen, the Classic, and the Magnum Folding Hunter knives. These knives set a standard for quality worldwide. Handles are of rare style and substance; solid, satin finished brass, with the warmth of tropical hardwood inlays. Blades are high carbon surgical stainless steel (Rockwell C57-59), ground to an incomparable sharpness by hand. Each blade locks open with authority.

^{††}Blade dimensions may vary slightly due to hand finishing.

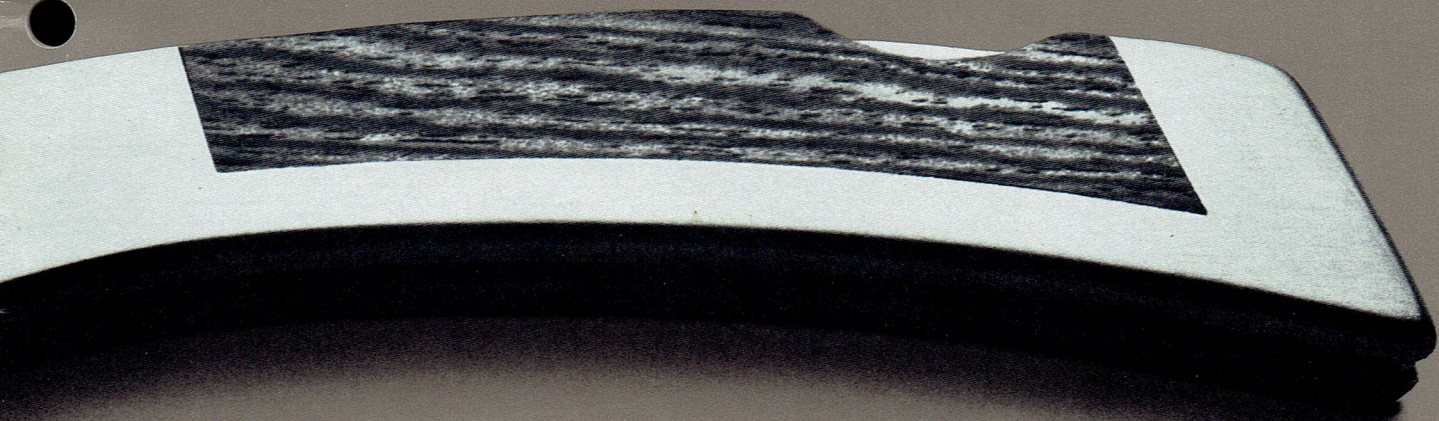

THE CLASSIC #6001
Single 2 3/8" drop-point blade.
Length open, 6 1/8"; closed, 3 1/2".
Blade thickness, .100". Scabbard optional.

FOLDING SPORTSMAN I #6101
Single 2 3/8" drop-point blade.
Length open, 6 1/8"; closed, 3 1/2".
Blade thickness, .100". Scabbard optional.

FOLDING SPORTSMAN II #6201
Single 3 1/2" trailing-point blade.
Length open, 8"; closed, 4 1/2".
Blade thickness, .100". Scabbard optional.

FOLDING SPORTSMAN III #6301
Single 3 1/2" trailing-point blade.
Length open, 8"; closed, 4 1/2".
Blade thickness, .100". Scabbard optional.

aking folding knives, I

knives are made by a different technique than had previously been used — an encapsulated handle that is incredibly strong and light. These were the brainchild of Blackie Collins, one of the founders of the Knife Makers Guild.

The Loveless Folder, which we feel is the strongest folding knife made, was designed by Bob Loveless, another founding member of the Knife Makers Guild. Subtlety of the flowing curves in this knife is a tribute to Bob's genius. The knife fits the hand like it belongs.

Gerber folding knives... the Brass Folding Sportsman, LST[®], Bolt Action[™], Loveless Folder,

Paul Knife[®], plus the unique Touche[™] Belt Buckle knives are prime examples of why Gerber has the reputation as the most innovative knife maker in the world.

As you turn the pages of this catalog, every Gerber knife represents our commitment to a standard of quality recognized and undisputed to be the very finest in the world... A standard we continue to improve upon even if it means changing the rules.

Paul Gerber

FOLDING SPORTSMAN II VASCOWEAR[®] BLADE #6236* *Made in U.S.A.*

Until now, the Vascowear blade has been the product of only a few top custom knife makers. This special high speed tool steel is famed for holding an edge longer than any steel we know. Gerber has hardened it to an exceptional Rockwell C59-61. Brass handle has distinctive black Micarta inlay. V-steel stamp on blade identifies it as not stainless.

MAN IIId #6301
Single 3½" drop-point blade.
Length open, 8"; closed 4½".
Blade thickness, .100". Scabbard optional.

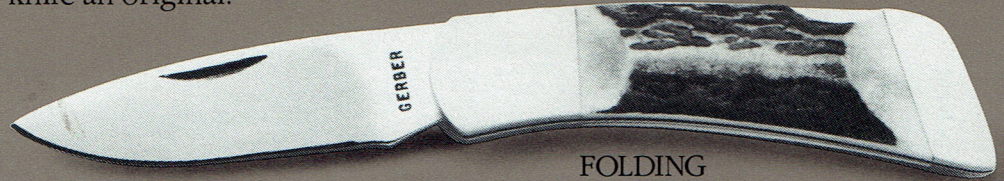

FOLDING SPORTSMAN III #6406
Single 4" trailing-point blade.
Length open, 9¼"; closed, 5¼".
Blade thickness, .125". Leather scabbard included.

MAGNUM FOLDING HUNTER #6506
Single 3¼" drop-point blade.
Length open, 7¾"; closed 4½". Blade thickness,
.125". Leather scabbard included.

*FSII V-STEEL #6236
Single 3½" trailing-point Vascowear[®] blade with
Positive lock. Length open, 8"; closed, 4½".
Blade thickness, .100". Includes leather scabbard.

STAG FOLDING SPORTSMAN *Made in U.S.A.*

Locking blades are Gerber high carbon surgical quality stainless steel. Handles crafted from solid brass, with a distinctive extra touch — rare natural Sambar Staghorn from India, providing a non-slip surface and making every knife an original.

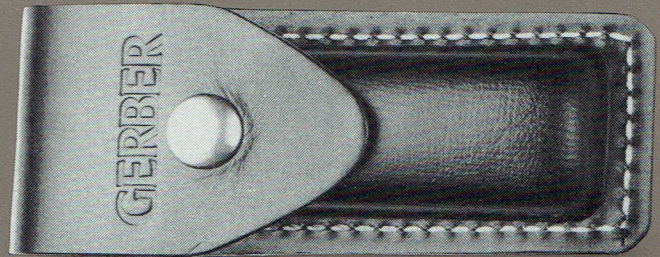

FOLDING
SPORTSMAN I STAG #6116
Single 2 $\frac{5}{8}$ " drop-point blade. Length open, 6 $\frac{1}{8}$ ";
closed, 3 $\frac{1}{2}$ ". Blade thickness, .100". Leather scabbard included.

FOLDING
SPORTSMAN II STAG #6216
Single 3 $\frac{1}{2}$ " trailing-point blade. Length open, 8";
closed, 4 $\frac{1}{2}$ ". Blade thickness, .100". Leather scabbard included.

TOP GRAIN LEATHER SCABBARD

for Folding Sportsmen knives, heat-molded for good looks and shape retention, hand sewn with bonded nylon thread. Optional lightweight Cordura® nylon scabbards available for some models.

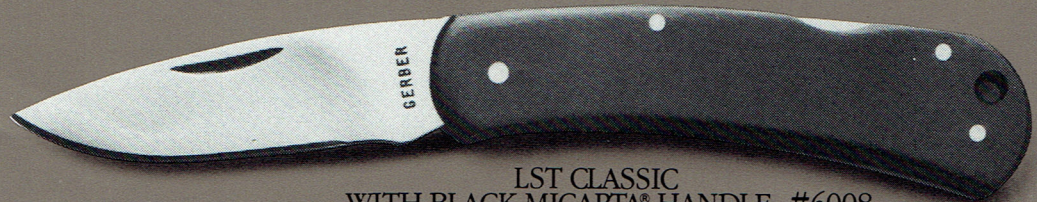

THE LST® FOLDING LOCKBACK *Made in U.S.A.*

The best lightweight pocket knife you'll ever own, the "LST" stands for light, smooth, and tough. *Light*, because the entire knife weighs only 1 $\frac{1}{2}$ ounces. *Smooth*, thanks to "lubricated for life" bushings that allow the blade to rotate easily. *Tough*, due to handles of Micarta® and Zytel®, plus Gerber high carbon surgical stainless steel blades, hardened to a Rockwell C57-59.

LST's feature Gerber's exclusive full concave grind for smoothness of cutting and ease of re-sharpening. In addition the #6009 checkered LST features Gerber's new high-tech blade finish.

LST CLASSIC
WITH IVORY MICARTA® HANDLE #6006
2 $\frac{5}{8}$ " drop-point blade. Length open, 6 $\frac{1}{8}$ ";
closed 3 $\frac{1}{2}$ ". Blade thickness, .100". Weight, 1 $\frac{1}{2}$ ounces.

LST CLASSIC
WITH BLACK MICARTA® HANDLE #6008
2 $\frac{5}{8}$ " drop-point blade. Length open, 6 $\frac{1}{8}$ ";
closed 3 $\frac{1}{2}$ ". Blade thickness, .100". Weight, 1 $\frac{1}{2}$ ounces.

LST CHECKERED, BLACK #6009
Same blade specifications as the LST Classic. Handle is made of Zytel®, a tough, virtually indestructible material from Dupont. Weight, 1.4 ounces.

"Where I come from, everyone cleans what they catch. So I've learned the good and bad points of most fishing knives first hand. That's why I was so impressed when Blackie Collins, our world-renowned knife designer, showed me the prototype for the new Bolt Action Fisherman. It had all the right features.

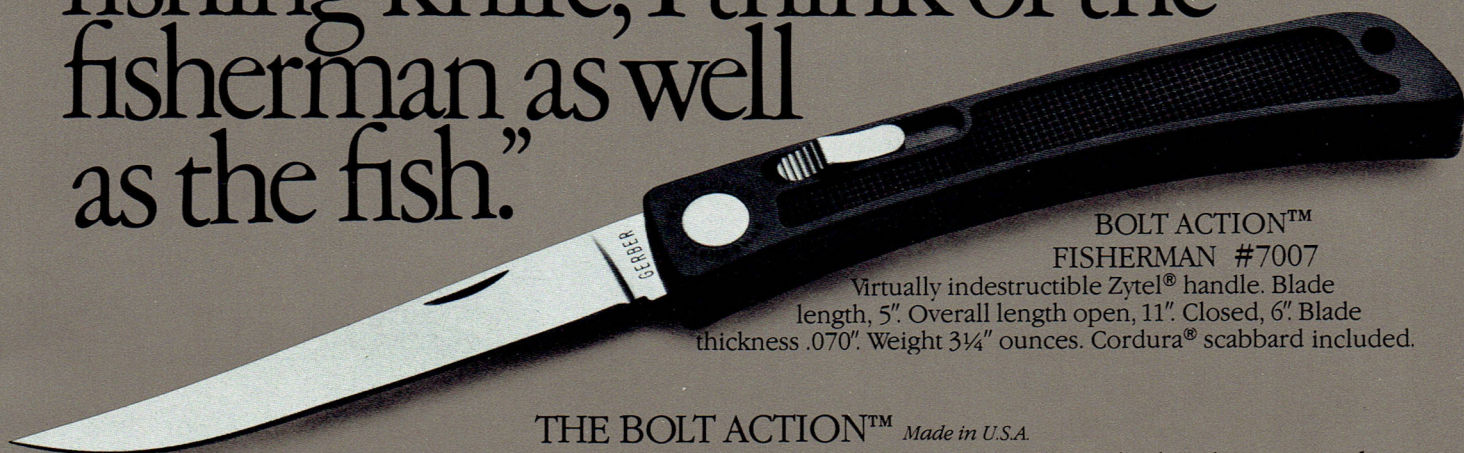

Revolutionary Bolt Action locking mechanism. One finger unlocks it. One hand closes it.

"Wait till you get your slippery hands on its non-slip black-checked handle. The flexible fillet blade is high carbon stainless steel and locks open firmly. And its specially developed concave grind provides a smoothness of cut and ease of sharpening second to none. Ultra-light, easy to clean, definitely a fishing knife that goes the limit. But don't take the word of a fisherman. Ask any bigmouth.

Pete Gerber, Chairman
Gerber Legendary Blades

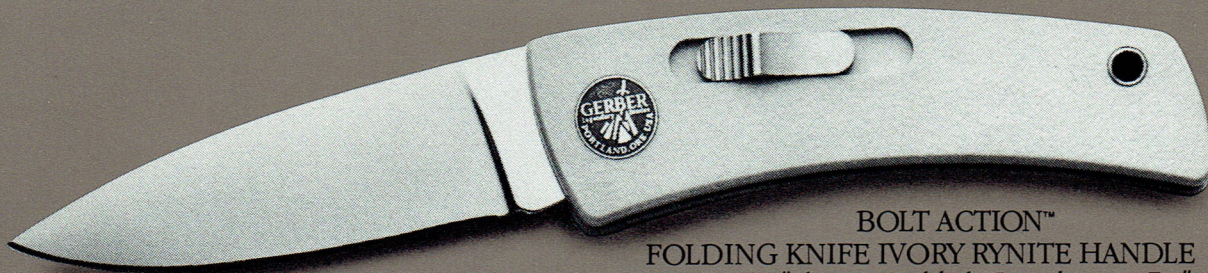

"When I make a fishing knife, I think of the fisherman as well as the fish."

**BOLT ACTION™
FISHERMAN #7007**
Virtually indestructible Zytel® handle. Blade length, 5". Overall length open, 11". Closed, 6". Blade thickness .070". Weight 3¼" ounces. Cordura® scabbard included.

THE BOLT ACTION™ *Made in U.S.A.*

Bolt Action™ Unique Positive Locking System *patent pending*. The harder you push, the tighter it locks. At only 3 ounces, it's extremely lightweight. The blade of Gerber high carbon surgical stainless steel with specially developed full concave grind, Rockwell C57-59, pivots on brass bushings, and locks solidly into place. Bolt action thumb release allows closing of the knife with one hand.

**BOLT ACTION™
FOLDING KNIFE IVORY RYNITE HANDLE #7008**
3¼" drop-point blade. Length open, 7½"; closed, 4¼". Blade thickness, .125". Weight 3 ounces.

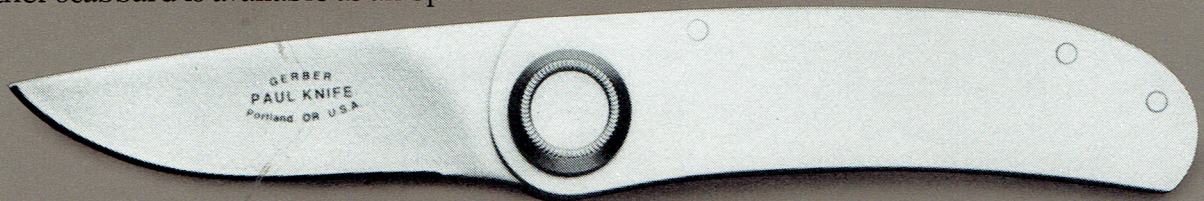

**BOLT ACTION™
FOLDING KNIFE BLACK CHECKERED HANDLE #7010**
3¼" drop-point blade. Length open, 7½"; closed, 4¼". Blade thickness, .125". Weight 3 ounces. Handle made of super tough Dupont Zytel®.

BOLT ACTION SCABBARD

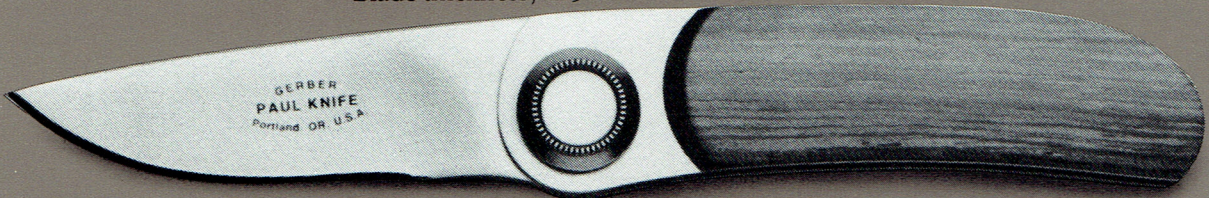

A light, long lasting Cordura® scabbard is standard. Optional: A handsome scabbard of top grain leather.

THE PAUL KNIFE® Patent No. 3942249 Made in U.S.A.

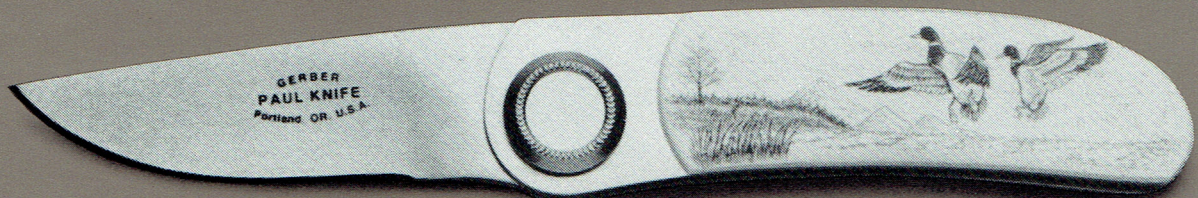

A legend in precision. Designed by aerospace engineer Paul Poehlmann, it's unlike anything you've ever seen or handled. A folding knife built like a fine watch. Components are high carbon, hardened, surgical stainless steel. Our patented axial locking mechanism allows opening and closing without even touching the blade. It locks firmly in both open and closed positions. Comes with suede leather pouch. Leather scabbard is available as an option.

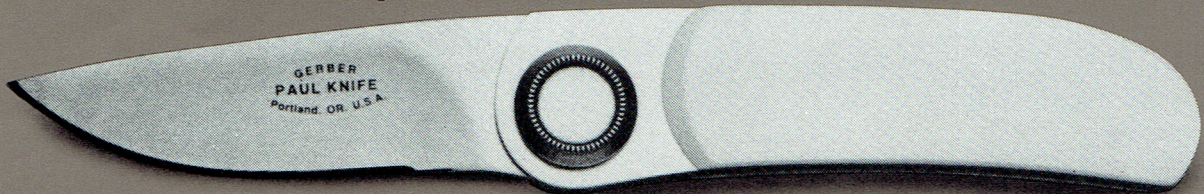

MODEL 2P STAINLESS STEEL #8001 2½" drop-point blade. Brushed stainless steel handle is easily personalized. Length open, 6"; closed 3½". Blade thickness, .115".

DELUXE MODEL 2PW #8006 Onlays of rare hardwood. 2½" drop-point blade. Length open, 6"; closed 3½". Blade thickness, .115".

DELUXE MODEL 2PMS #8009 Ivory colored onlay with reproductions of scrimshaw scenes on both sides. 2½" drop-point blade. Length open, 6"; closed 3½". Blade thickness, .115".

DELUXE MODEL 2PM #8011 Ivory colored onlays. 2½" drop-point blade. Length open, 6"; closed, 3½". Blade thickness, .115".

THE LOVELESS FOLDER Made in U.S.A.

This special knife, conceived and designed by world renowned craftsman Bob Loveless, could very well be the finest lock-back knife available today.

Its blade is "fine blanked" from the finest premium grade high carbon stainless steel and hardened to a Rockwell C57-59.

The pin mechanism, rivets, and pivot pins are all finely machined from 100% solid stainless steel.

The Loveless Folder's unique handle is perfectly shaped and balanced for comfort and its soft gun-grip inlays secure your grip. Handle is made of nickel silver using "state-of-the-art" techniques. Results are a hefty, substantial knife with a remarkable feeling of belonging in your hand.

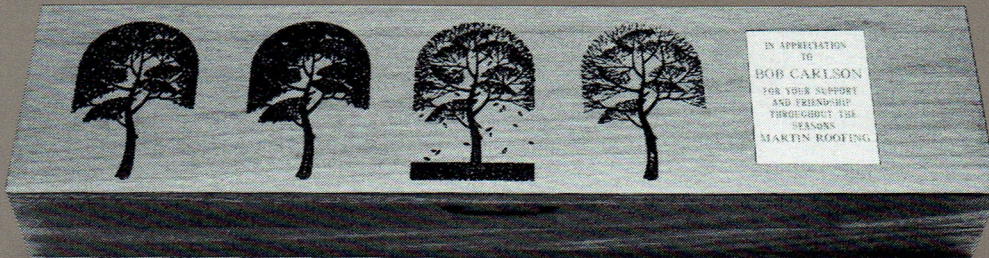

THE LOVELESS FOLDER #8052 2¾" drop-point blade. Length open 6½"; closed 3¾". Weight, 5½ ounces. Includes Cordura® belt sheath.

PERSONALIZED ENGRAVING, ETCHING, and IMPRINTING

The only way to improve upon a Gerber knife and make it more meaningful is by personalizing it with initials, name, logo or personal inscription. Anyone who receives a gift of a personalized Gerber product is quick to appreciate it.

Engraving and etching of handles and blades as well as personalized plates for hardwood chests are available upon request from Gerber at a nominal charge.

STANDARD ENGRAVING:
Includes initials, names or inscriptions from standard type styles. We engrave directly into the knife handle, or into brass or anodized aluminum plates, which are then affixed to any of our hardwood chests.

CUSTOM ENGRAVING, ETCHING & IMPRINTING:
(Available only on special quantities and costs will be quoted upon request.) Given some lead time, Gerber craftsmen can custom personalize any Gerber knife with company logos, insignias or design.

ENGRAVING STYLES:

Single Line Script Names, dates, for graceful effect

Double Line Century Names, dates, inscriptions

DOUBLE LINE CENTURY CAPITALS Names or initials

TRIPLE LINE ROMAN Names or initials

Old English Condensed Names or initials

THE TOUCHÉ® BELT BUCKLE KNIFE (patent pending) Made in U.S.A.

Easily the most unique knife innovation in recent history. A handsome belt buckle that also happens to be a practical knife, handy enough for all kinds of everyday cutting jobs.

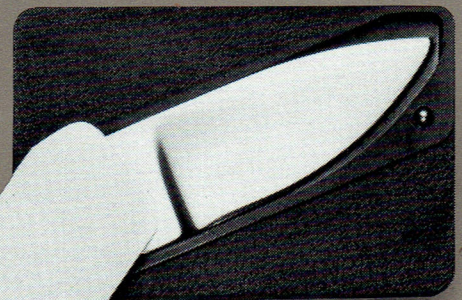

Designed exclusively for Gerber by Blackie Collins. The cross-piece rotates downward to become the handle of a knife that lifts out of the buckle. Base of the buckle is made of DuPont Rynite®, an incredibly tough synthetic material, or brass, for an exceptionally handsome buckle. Blade is made of high carbon surgical stainless steel. Blade length 1 7/8"; overall length 4 7/8"; thickness .100".

DOUBLE EDGE SURVIVAL BLADE #7503
Blackened 3½" blade. Overall length, 7⅞". Blade thickness, .187".

GERBER FISHING AND HUNTING KNIVES Made in U.S.A.

FISHING KNIVES: Four outstanding fish knives. The Pixie, Trout & Bird, Coho, and Muskie feature blades of high carbon surgical stainless steel that resists stains and moisture, even in saltwater.

HUNTING KNIVES: Seven exceptional outdoor knives with blades made of exceedingly hard M-2 high-speed tool steel. Hardened to a Rockwell C60-62, these blades take a sharp edge and hold it longer. *Blade Dimensions may vary slightly due to hand finishing.*

PIXIE #5516 3" straight-back blade for cleaning small game and fish. Length, 7". Blade thickness, .050". Scabbard included.

TROUT & BIRD #5501 3¼" blade with special sharpened tip and a stripping spoon handle. Length, 8". Blade thickness, .050". Scabbard included.

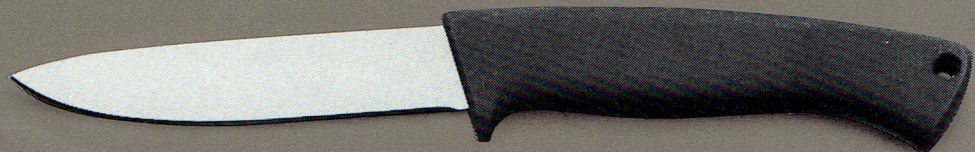

COHO #5506 6" blade with stripping spoon handle. Length, 11¼". Blade thickness, .080". Scabbard included.

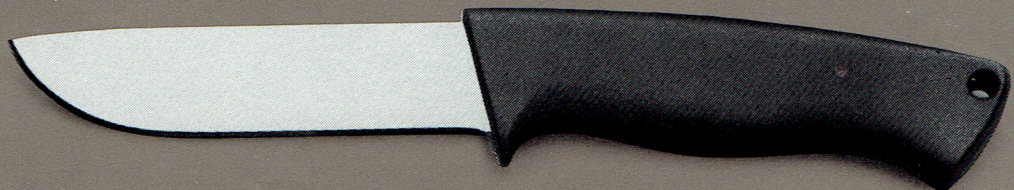

MUSKIE #5511 6" blade ideal for boning and filleting any size fish. Length, 11¼". Blade thickness, .080". Scabbard included.

A-325 #5201 3¼" game and fish blade, ideal for cleaning smaller catches. High speed tool steel. Length, 7½". Blade thickness, .062". Scabbard included.

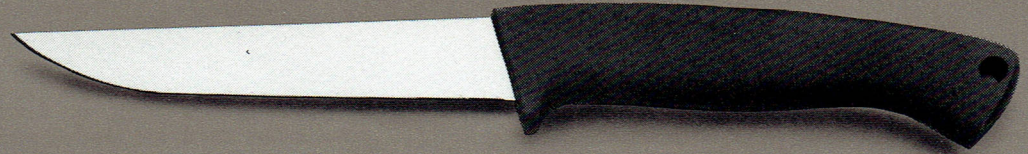

A-400 #5206 4" drop-point blade, for all-purpose hunting, fishing. High speed tool steel. Length, 8½". Blade thickness, .088". Scabbard included.

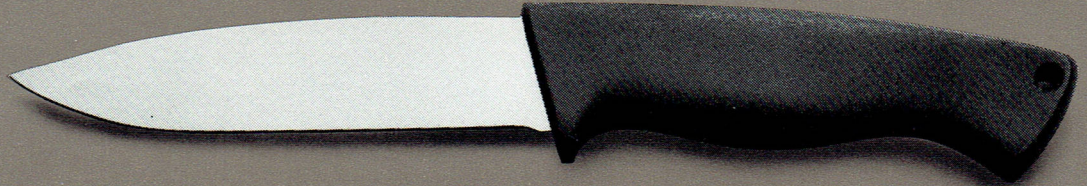

A-425 #5211 4¼" utility skinning blade. High speed tool steel. Perfect for camping and field dressing. Length, 8¾". Blade thickness, .100". Scabbard included.

Gerber's A-series knives, used by sportsmen worldwide, are famous for their toughness and superior sharpness. Their durable solid aluminum handles are cast directly on notched tangs and coated with Gerber's special textured coating for a tough, slip-proof grip. A-series knives come with hand-fitted leather belt scabbard made in Gerber's own leather shop.

A-450 #5216 4½" general utility blade. High speed tool steel. Length, 9". Blade thickness, .088". Scabbard included.

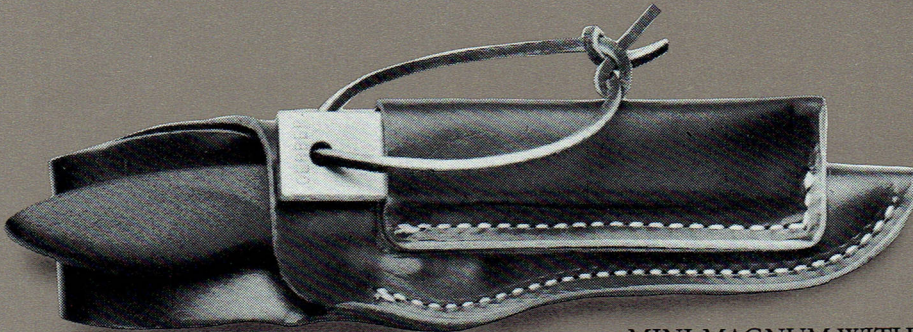

A-475 #5221 4¾" drop-point blade, designed for large game. High speed tool steel. Length, 9¾". Blade thickness, .100". Scabbard included.

THE SHORTY #5531 4½" trailing-point blade. High speed tool steel. Length, 9¼". Blade thickness, .088". Scabbard included.

THE MINI-MAGNUM #5546 4" trailing-point blade. High speed tool steel. Length, 8¼". Blade thickness, .062". Scabbard included.

CAMOUFLAGE HUNTING KNIFE

Gerber's popular A-400 is the ideal versatile hunters knife. It's polished 4" drop-point blade is made of high-speed tool steel that is known for its superior edge holding even under the most severe conditions. The camouflage A-400 handle is high tensile strength cast aluminum, the grip non-slip, and the jungle leaf pattern finish is epoxy tough. The scabbard is made from DuPont's super fabric, Cordura,[®] and duplicates the handles camouflage pattern.

Camouflage scabbard available for FS II folding knife. (See price list).

A-400 CAMO #5205 4" drop-point blade. High speed tool steel. Overall length 8½", blade thickness .088". Camouflage Scabbard included.

PRESENTATION SERIES OUTDOOR KNIVES *Made in U.S.A.*

These, we believe, are the finest outdoor knives that technology and the human hand can produce. They are as close to a custom handmade knife as you can achieve from production.

A handcrafted leather belt scabbard, made in Gerber's own leather shop, included with all Presentation Series Knives.

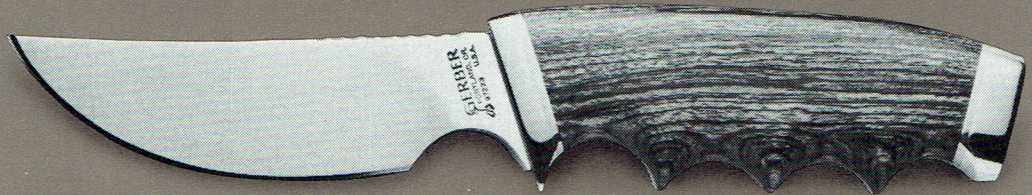

There are *five blade styles* made from Gerber high carbon surgical stainless steel, hardened to a Rockwell C57-59. Each blade comes with a choice of two handle materials — wood or Cushiongrip™.

CUSHIONGRIP™ made from Dupont Hypalon® is an exceptional handle. This synthetic rubber material grips firm and won't slip in any weather condition, wet or cold. It is without a doubt, the most comfortable handle a knife can have. With a grip you'll have to squeeze to believe. Cushiongrip handle shown on 525S, bottom of page. Available with all five presentation blades.

WOOD HANDLES are hand-carved from solid, uniquely grained Cordia hardwood, for a comfortable, controlled grip, each with a one-of-a-kind look.

400S WOOD #5001 400CG CUSHIONGRIP™ #5026 (not shown)
4" skinning blade. Length, 9". Blade thickness, .156". Scabbard included.

425S, WOOD #5006 425CG, CUSHIONGRIP™ #5031 (not shown)
4¼" hunting/camping blade. Length, 9¼". Blade thickness, .156". Scabbard included.

450S, WOOD #5011 450CG, CUSHIONGRIP™ #5036 (not shown)
4½" fish and game blade. Length 9½". Blade thickness, .156". Scabbard included.

475S, WOOD #5016 475CG, CUSHIONGRIP™ #5041 (not shown)
4¾" big game blade. Length, 9¾". Blade thickness, .187".

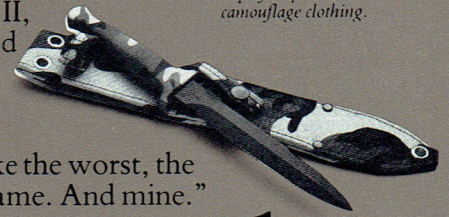

525S, WOOD #5021
5¼" heavy duty big game blade. Length, 10½". Blade thickness, .187".

525CG, CUSHIONGRIP™ #5046
5¼" heavy duty big game blade. Length, 10½". Blade thickness, .187".

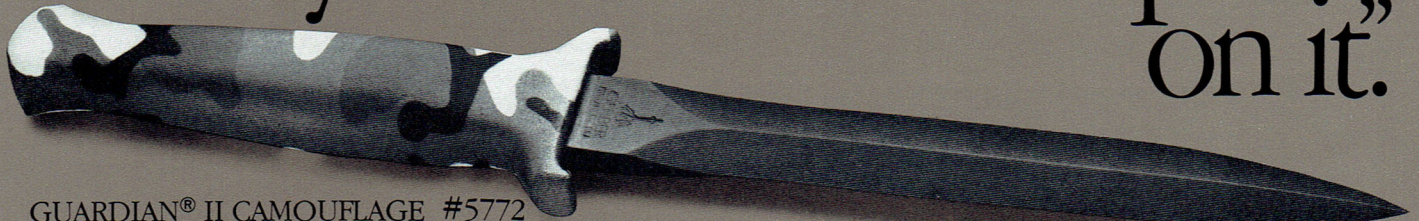

"Of the 20 different survival knives I make, my new camouflaged models are clearly the most specialized. Take a closer look at the Guardian II, for example. Riding on the hip, its unique handle and scabbard fade into the bush. Black as night, its electrostatically coated surgical stainless steel blade reflects nothing. And with either edge, can cut its way out of just about anything. Built to give and take the worst, the Guardian II is one survival knife that lives up to its name. And mine."

Matching jungle pattern on handle and scabbard blends perfectly with most camouflage clothing.

*Pete Gerber, Chairman,
Gerber Legendary Blades*

"When I make a survival knife, I never forget your life could depend on it."

GUARDIAN® II CAMOUFLAGE #5772
Slip-proof, high tensile cast aluminum handle. 6¾" blade. Overall length, 11¾". Weight, 8 ounces. Blade thickness .250". Metal-lined camouflage Cordura® scabbard included.

Made in U.S.A.

GUARDIAN® CAMOUFLAGE #5816
Patent No. D267104. 3⅜" blade. Overall length, 7¼". Blade thickness, .172". Weight, 3½ ounces. Camouflage scabbard included.

GUARDIAN I® CAMOUFLAGE #5675
Patent Pending. 4¾" blade. Overall length, 9". Blade thickness, .172". Weight 4 ounces. Camouflage scabbard included.

New A-400 Camouflage hunting knife. (Shown on page 13).

#5897

CAMOUFLAGE GUARDIAN® KIT

This new set comes complete with its own special hardwood storage chest. Set includes Gerber Guardian, Guardian I, Guardian II camouflage survival knives with matching camouflage Cordura® scabbards, sharpening steel and black Guardian Harness assemblies. Camouflage Guardian Kit (#5897).

Also available: Standard Guardian Kit (#5898). Deluxe Guardian Kit limited edition features Loveless signature and matching serial number etched on each knife (#5899).

SURVIVAL KNIVES *Made in U.S.A.*

All come with blades of Gerber surgical stainless steel. Every handle is high-tensile cast aluminum, electrostatically coated with an epoxy finish that wears like iron, with a grip that is virtually slip proof. Optional blackened blades are available on all survival knives. Leather scabbard included with all knives.

THE GUARDIAN® #5801 (Patent No. D267104)
3 $\frac{3}{8}$ " blade. Overall length, 7 $\frac{1}{4}$ ". Blade thickness, .172".
Weight, 3 $\frac{1}{2}$ ounces. Belt/Boot Scabbard.

GUARDIAN I® #5676 (Patent Pending) 4 $\frac{3}{4}$ " blade.
Overall length, 9". Blade thickness, .172". Weight, 4
ounces. Belt/Boot Scabbard.

GUARDIAN II® #5776 (Patent Pending) 6 $\frac{3}{4}$ " blade.

PRESENTATION SURVIVAL KNIVES *Made in U.S.A.*

Presentation survival knives are hand made and feature elegant handles of tropical hardwood or Sambar staghorn with solid brass guards and butt caps. These polished Gerber high-carbon stainless steel knives are perfect engraved or etched for commemorative or personalized showpieces. Comes with leather scabbard.

PRESENTATION GUARDIAN® #5811
3 3/8" blade. Overall length, 7 1/4".
Blade thickness, .172". Scabbard included.

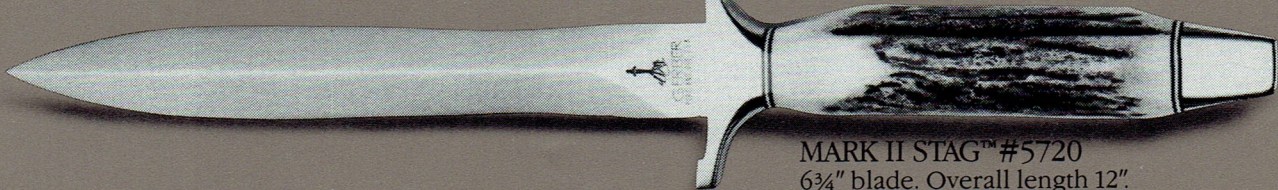

PRESENTATION MARK I™ #5611
4 3/4" blade. Overall length, 9".
Blade thickness, .250". Scabbard included.

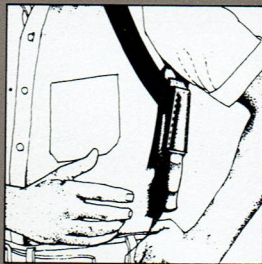

PRESENTATION MARK II™ #5711
6 3/4" blade. Overall length 12".
Blade thickness, .250". Scabbard included.

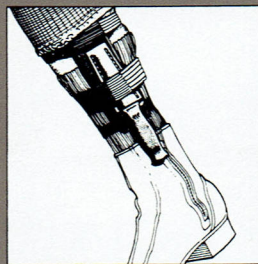

MARK I STAG™ #5620
4 3/4" blade. Overall length, 9".
Blade thickness, .250". Scabbard included.

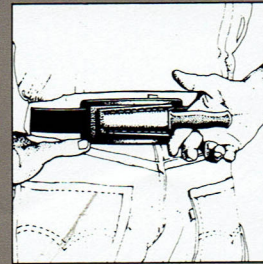

MARK II STAG™ #5720
6 3/4" blade. Overall length 12".
Blade thickness, .250". Scabbard included.

The Guardian's shoulder harness for under-the-arm wear: a part of the optional harness package.

Another part of the optional package: the Guardian's leg harness.

The leather platform lets you wear the Guardian comfortably, and inconspicuously on your belt.

THE HARNESS PACKAGE: The optional harness package available only for the Guardian, Guardian I, Mark I, and Command I, includes a leather scabbard similar to the one that comes standard with the Guardian. Both scabbards have a spring-loaded locking device that keeps the knife securely in place until it's needed. But the scabbard that comes with the harness package has one important difference. Instead of a metal clip, there's a velcro type adhesive that allows you to attach the scabbard to other parts of the harness assembly.

As the manufacturer of knives, Gerber Legendary Blades does not assume responsibility for compliance with federal, state or local laws related to ownership or carrying of concealed weapons. Please check the applicable regulations in your area.

FRISCO SHIV™ (patent pending) Made in U.S.A.

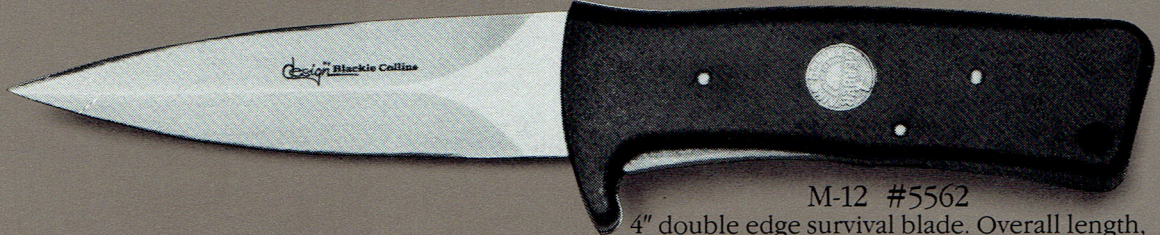

A tough hunting/survival knife with style. Designed by Blackie Collins, the Frisco Shiv is no ordinary knife. Inspired by the original handmade Frisco Shiv — Blackie's most popular custom knife ever.

The Gerber Frisco Shiv System consists of five models, offering three different Gerber high carbon stainless steel blades and two handle styles. Each model features the same locking scabbard and integral retention mechanism that allows the knife to be carried in any position. Scabbard has belt/boot clip.

8" SPORTSMAN'S STEEL #9801
With leather handle/storage sheath. Steel folds out to 270° for safe, easy use.

SharPak™ KNIFE SHARPENER *(patent pending)*

This exclusive Gerber innovation makes knife sharpening foolproof. The SharPak,™ designed by Blackie Collins, is a self-contained, lightweight sharpener which takes the guesswork out of sharpening. Built-in angle guide insures proper blade edge angle.

SharPak™ MODEL C #9833 Comes with a unique white "Crock-stick" type ceramic sharpener. It's harder than all metals, harder than all naturally occurring substances except diamond. The grooved sharpening surface is ideal for touch-up sharpening. Weight 3½ ounces.

SharPak™ MODEL CD #9834 Features an additional diamond sharpening surface, which is affixed to the back of the ceramic sharpener. This combination sharpening unit is interchangeable in the SharPak and gives the user the ultimate sharpening device. The most convenient and effective sharpener we've seen. Overall Length: Open, 8"; Closed, 4½". Sharpening Surface: 7/8" x 3½". Weight 3½ ounces.
