New fire starter lights the way to convenience, safety

The compact and lightweight Strike Force® Fire Starter System sparks interest among campers, backpackers, mountain climbers and other outdoor enthusiasts. See Page 3 for a detailed description.

New Directions in '93

Striving to make the best knives possible has been the goal at Gerber Legendary Blades since we began making them in 1939. Today that goal is still our foremost concern. Yet there is an exciting change to that goal. In addition to the best knives, we are now producing other premium outdoor equipment.

As you look through these pages, you will notice new non-cutlery items designed for the outdoor market. For example, the Strike Force® Fire Starter System. We developed this unit by consulting with one of the foremost survival experts in the world. We are confident that our fire starter is the best available today.

Our new high-tech signal mirror is a product that has been carried by rescue professionals, mountain climbers, and military personnel for years. This product is just now becoming recognized and adopted by the majority of outdoor enthusiasts as an essential part of their equipment package. Our signal mirror is the first to use advanced technology to create an unbreakable, buoyant and easy to aim star shaped sighting system. Gerber's signal mirror is already standard issue in the United States military.

The Multi-Plier® is yet another example of an innovative product developed for the outdoor recreation market. Its combination of handy tools and ease of use make it the most popular tool of its type. In fact, it was voted the "Overall Knife of the Year" for 1992 by cutlery manufacturers from around the world.

Gerber knives continue to be the choice of people who want top-of-the-line products. Proudly made in the United States, we use the finest cutlery steel available, but we also use something that is less common in the cutlery industry today; human hands. Many of our knives are still hand beveled, hand sanded, hand sharpened and hand assembled. And of course, each knife is hand inspected for quality.

When you buy a Gerber, you're not just buying a knife, you're buying a legend.

Innovative designs, as demonstrated by these early production sports knives, has made Gerber Legendary Blades an industry leader.

OUTDOOR RECREATIONAL PRODUCTS

On the 4th of November, 1991, Jay Gaudreau was elk hunting in Montana.

He hunted through downed timber and knee deep snow all morning and had decided to return to his truck. On the return hike a snow storm

dropped visibility and temperatures and Jay became disoriented. He decided he was lost and

that starting a fire could mean life or death for him. Opening his pack, he remembered his Fire Starter tinder cubes. He lit a cube, dried the available fire materials and soon had a life sustaining fire. If he

had only had matches, lighting a fire would have been next to impossible. Jay walked out the next morning and discovered that over 20 people had searched for him the previous night. He has subsequently purchased Fire Starter tinder cubes for all of his friends. They *can* mean the difference between life and death!

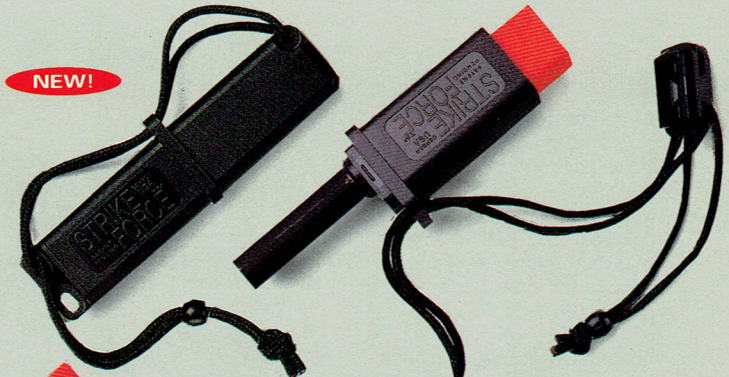

We didn't discover fire, just a better method to create it.

Matches can get wet and lighters can break but the Strike Force® Fire Starter System from Gerber provides everything you need to start a fire anywhere, anytime. This unit combines flint, striker and tinder into a compact, lightweight and unbreakable casing. Add to these features a reasonable cost and you have a combination that outdoor enthusiasts get . . . well . . . enthusiastic about! Keep one in your car, backpack and at home and the Strike Force® truly will be the last match you'll ever need!

Strike Force® Fire Starter System

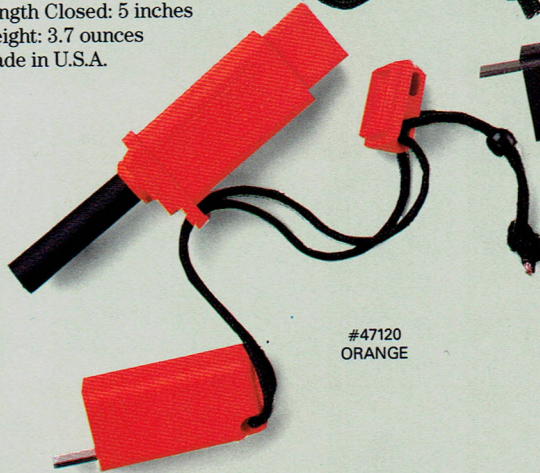

By dragging the striker bar across the flint rod, you generate intensely hot sparks. These sparks, when aimed correctly, will ignite the fire starting tinder cube provided. Whether the unit is wet or not, you will be able to light the long lasting fire starting tinder cube.

- Length Closed: 5 inches
- Weight: 3.7 ounces
- Made in U.S.A.

Signal Mirror

The Gerber Signal Mirror was designed to solve the problems that exist with other mirrors on the market today. Built from Lexan™-polycarbonate, it floats, is lightweight, easy to aim and nearly unbreakable. Its reflections can be seen by potential rescuers for up to 100 miles (as tested by the U.S. Military). Signal mirrors have long been used by rescue and military personnel and are now being accepted by the civilian population as an essential part of their equipment when participating in outdoor activities. No one plans on getting lost, but it does happen. Keep the Gerber Signal Mirror with you and it might save your life!

- Length: 3 inches
- Width: 2 1/16 inches
- Weight: .7 ounces
- Made in U.S.A.

Pro Guide™ II Hunting Knives

The serious hunter will immediately recognize the benefits of a good knife such as edge retention and sharpness and a textured durable handle. The Pro Guide II was designed with these serious hunters in mind and offers the features mentioned above in a clip and drop point as well as a skinner and caper model. Full tang construction, 400 series stainless steel high carbon blades, a lightweight and compact design all come together to form a knife that will last through generations. What more could you ask for in a fixed blade knife? Each Pro Guide II comes with a durable black ballistic cloth sheath.

- Textured and notched handle for comfort and safety.
- High carbon stainless steel for superior edge retention.
- Sturdy Black Cordura Sheath.

SPECIALIZED MULTI-PLIER® POCKET TOOL

How many times have you been caught on an excursion without the proper tools? People who work and play in the outdoors often find they need to improvise a repair in order to continue and that can mean using any tool

you can put your hands on. Although you can't predict

what you'll need when, with the Gerber Multi-PLIER® on your belt, you'll have instant one-handed access to 13 primary tools.

**"The tool box
that fits in the
palm of your hand!"**

Toting a heavy tool box from chore to chore can be a handyman's nightmare. If only you could carry a dozen or more tools in your pocket. Unrealistic? Not any more, thanks to the Gerber Multi-Plier®. This multi-functional tool contains 13 tools! For one-handed use, simply flick your wrist to bring the plier tool to the open position. You then have access to many other handy tools. It's like having a tool box that fits in the palm of your hand.

Multi-Plier® Tool

Made from the finest high carbon stainless steel available, the Multi-Plier is built for years of rugged use. Measuring only four and one-half inches long in its closed position, it is easy to carry with you at all times. Contains pliers, three straight head screwdrivers, one cross-head screwdriver, lanyard ring, can and bottle openers, utility blade, drop point blade, serrated sheepsfoot blade, scale and wire cutter.

- Weight: 8 ounces
- Length Open: 6 inches
- Length Closed: 4½ inches

LIGHTWEIGHT KNIVES

World renowned explorer Will Steger was the first man to lead an international

expedition to the North Pole by dog sled since Robert E. Perry in 1909. Steger's expedition faced the most tortuous environmental conditions on earth. Steger was carrying Gerber knives as part of his equipment because of their lightweight construction and tremendous durability. During

his adventure one of his sled dogs fell into a deep crevasse and hung precariously by a light safety line. Steger lowered himself by rope into the

crevasse. After failing to untangle the dog, he elected to save it by cutting it free with his Gerber lightweight knife.

Man and equipment performed flawlessly. The story ended happily because

of the skill and courage of Will Steger and the performance of his equipment. When you select equipment, always pick the best.

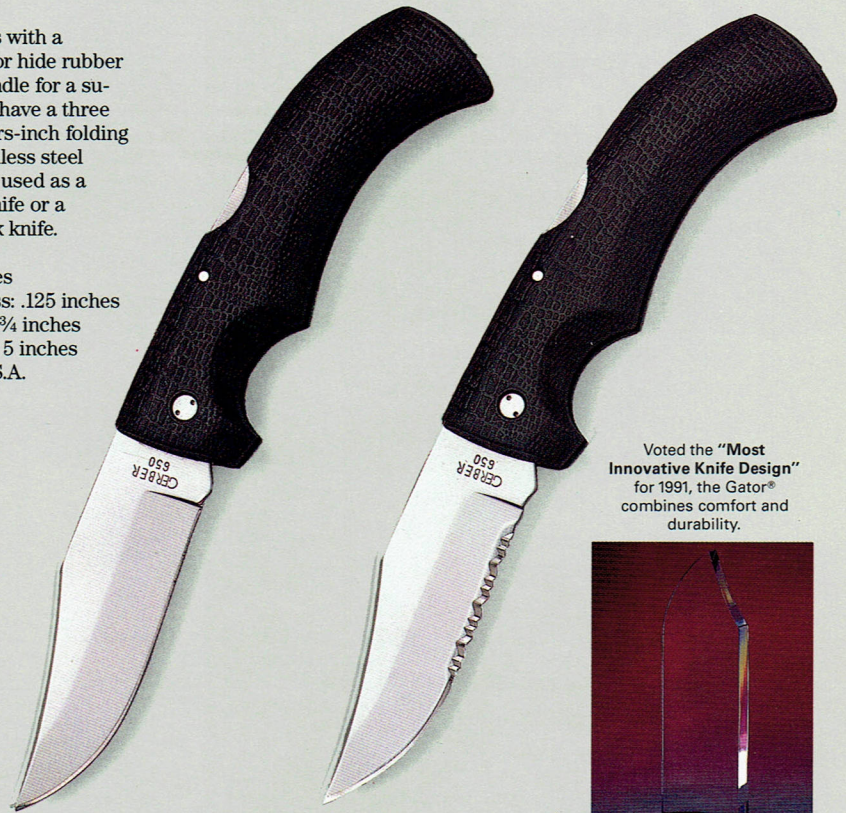

Everyone wants to "Getta Gator"

Gator® knives re-wrote lightweight knife design history with their comfortable, lightweight and durable handles. The first knife to successfully combine a hard inner-core handle with a soft rubber outer shell, the Gator® became overwhelmingly popular overnight. Its finger notch and simulated alligator skin texture provide a comfortable and secure grip even when wet. One hundred percent stainless steel components make these knives attractive and low in maintenance.

Gator® and Gator® Serrater

Each knife comes with a simulated alligator hide rubber encapsulated handle for a superior grip. They have a three and three-quarters-inch folding high carbon stainless steel blade and can be used as a regular pocket knife or a multiple use work knife.

- Weight: 5 ounces
- Blade Thickness: .125 inches
- Length Open: 8¾ inches
- Length Closed: 5 inches
- Made in the U.S.A.

GATOR SERRATER

Voted the "Most Innovative Knife Design" for 1991, the Gator® combines comfort and durability.

Gator-Mate®

Gerber's Gator knife has spawned a smaller version of itself called the Gator-Mate. The Gator-Mate's handle is identical to its widely popular namesakes with a hard-molded inner-core of fiberglass filled nylon and a soft cover of Kraton™ elastomer. The lightweight yet incredibly durable Gator-Mate is perfectly suited to a wide variety of outdoor activities such as backpacking, boating and fishing. These knives come with a built-in safety stop which holds the blade at the half closed position until the user is ready to push it into the handle. Each comes with a rugged black ballistic cloth sheath.

- Blade Length: 2¾ inches
- Length Open: 7¼ inches
- Length Closed: 4½ inches
- Weight: 3.2 ounces
- Made in the U.S.A.

Gerber's lightweights are legendary.

Gerber Legendary Blades pioneered the use of lightweight materials for pocket knives. We continue to build the finest lightweight knives available today. From the key-chain sized Micro-light to the pocket sized Ultralight and L.S.T.® you will find a knife to fit your needs. For tougher chores, the large Magnum L.S.T.® will handle the job. All of our lightweights feature virtually indestructible fiberglass reinforced nylon handles combined with precision stainless steel pins and blades to produce a knife of legendary durability and quality. The name of the L.S.T.® sums up this line of knives: Light, Smooth and Tough!

L.S.T.® Knives

These knives earn their name: Light, smooth and tough! Nearly unbreakable handle is coupled with a high carbon stainless steel blade for a pocket knife that will last for years.

POLICE AND MILITARY KNIVES

I am one of the three surviving crew members of the B-52 that went down in the Indian Ocean (during the Persian Gulf Crisis). After ejecting from the aircraft and finding myself in the wreckage I attempted to swim away from the plane, which not only was exploding but also was spewing burning fuel. As I began to swim away my feet and legs became entangled in the parachute's risers and lanyards. I used my Gerber boot knife to cut myself out of the entanglement — a knife I bought two years ago and never sharpened! The edge on it from the factory held up beautifully! Needless to say I am forever sold on your knives. Once again thank you, thank you, thank you for a job well done!"

This letter was received by Gerber Legendary Blades in January, 1991 from Captain Jeff Love, USAF

A boot knife you can count on.

This entirely new patented design is a descendent of our time tested Guardian knife. The Guardian Back-Up®'s sheath is hard-molded with a slim profile, adjustable knife withdrawal force, and rotatable metal boot clip. The handle has a hard-molded core with a tough, attractive, non-slip Santoprene™ cover. This comfortable handle also features texture lines and thumb indents for a sure grip. These elements combine to produce the best boot knife available in the world today.

Guardian Back-Up®

The adjustable knife lock system allows various degrees of release tension for the knife. This knife is jump certified and can be carried at any angle. The slim design makes this a lightweight knife and the high carbon stainless steel blade has a blackened finish.

- Overall Length: 7½ inches
- Blade Thickness: .156 inches
- Weight: 3 ounces
- Made in U.S.A.

#05803

Patriot® Knife

The Patriot knife was designed by Blackie Collins to fulfill the requirements of special police and military units. With its two stage safety system sheath to prevent loss and limit unauthorized use, it offers security and speed of deployment never seen before. The Patriot's sheath is hard-molded for protection of the knife and user in rugged combat situations. The sheath was also designed to offer many carry options for the user such as standard and web-belt configurations, strap tie downs, and D-ring attachment. The knife has a precision ground high carbon stainless steel blade and Zytel™ handle with steel butt-cap. The entire unit is non-glare black in appearance. No matter what the task, the Patriot is ready for action!

- Blade Length: 6 inches
- Overall Length: 10½ inches
- Blade Thickness: .24 inches
- Weight: 8.6 ounces
- Made in U.S.A.

PRESENTATION/PERSONALIZATION

Add a personal touch to a sharp gift or award

Many Gerber products can be personalized to add a distinctive look to personal or corporate gifts and awards. We can put your company logo, initials or artistic design on a number of different knives. We offer a wide variety of customizing techniques including:

- Electro Etching
- Gold Plating
- Lazer Etching
- Custom Handles
- Medallions
- Pad Printing
- Custom Scrimshaw
- Serializing
- Custom boxes, stands and sheaths.

Call or write us today for more information on your personalization projects.

Brass Folding Knives

Our brass folding knives are truly works of art that will provide a lifetime of faithful service. They are the best folding knife available because they combine precision ground stainless steel blades with hand fitted exotic hardwood inlays and a solid brass frame. Quality hands-on construction make these knives unsurpassed in fit and finish.

Folding Sportsman I

250A/BLACK PEARL

Accessories

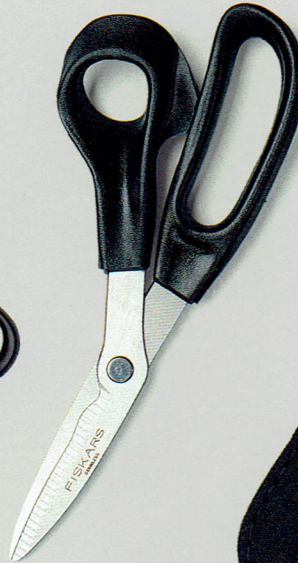

Our sharpeners, scissors and hats were developed to complement our other products. As a Fiskars company, we are recognized for our high quality scissors. The selection here is no exception. These scissors were made with the outdoor enthusiast in mind to provide the user with cutting options that would not be practical when performed with a knife. The patented sharpeners are some of the best around for field use and don't forget our attractive American made hats for the hunter or fisherman in your family.
