Winter '93-'94

EK MICARTA SERIES

The M-3 & M-4 are both classic style daggers. The M-3 has an edge and a half, while the M-4 is completely double edged. The M-5 is more of an all purpose knife, while the M-4 is designed specifically for combat. Durable Micarta handles are comfortable in a variety of grip positions. Both daggers sport full tang construction, linen Micarta handles attached by three brass screws, brass guards, a 3/16" thick razor sharp blade, and rugged Nylon sheaths.

The M-5 sports the same durable features along with a 5/32" thick Bowie style blade with a single edge. Excellent combat-utility design. This is one tough knife! Rugged Nylon sheath included.

EK SWAT SERIES

The SWAT series from Ek is unique in the fact its handle is wrapped with 18 feet of 550 lb. test paracord, which besides being a comfortable grip, could be a lifesaver in an emergency situation. The SW-3 has a fully sharpened edge as well as a sharpened false edge, while the SW-4 has a fully sharpened double edge. The SW-3 is more of an all purpose blade, and the SW-4 is designed specifically for combat. The SW-5 has a Bowie style blade and is great for utility knife work as well as combat. Each Ek SWAT has an extended pommel handy for prying or pounding. All SWAT series knives include durable Nylon sheaths.

EK WARRIOR SERIES

These are the closest knives you'll find to the original John Ek WWII designs. The SW and SWB feature black paracord handles wrapped with 18 feet of 550 lb. test paracord for use in an emergency. Rugged Black Nylon sheath included. The WR and WB have triple riveted walnut handles which can be easily contoured for custom fit when filed. Rugged green Nylon sheath included. All Warrior blades are bead blasted for a non-reflective finish making them very discreet field knives. Each Warrior blade is full thickness, full tang made of high carbon stainless steel. The Warrior and SWAT Warrior blades feature a fully sharpened edge as well as a sharpened false edge. The Warrior Bowie and SWAT Warrior Bowie blades have a fully sharpened single edge.

ATTACK BOWIE, WOODSTALKER & STEALTH

The Attack Bowie features a finger grooved StaminaWood handle. StaminaWood is a resin impregnated wood that has been compressed to increase strength.

The Woodstalker is not only low-profile, but functional as well. The blackened blade, guard & rivets undergo a static powder coating treatment which makes them extremely scratch and chip resistant. This beauty has a contoured walnut handle.

The Stealth is the same knife as the Woodstalker but features a neoprene handle.

AUSTRALIAN BOWIE

The Australian Bowie is patterned after the combat knife made in Australia for American servicemen during WWII. Soldiers were asking for a knife that was useful, not only for combat, but for daily chores as well. The spearpoint designed full-tang blade and smooth walnut handle make this not only a great collectable, but also a working piece of history. Deluxe brown leather sheath.
