

AMERICA'S FINEST MILITARY KNIVES

BATTLE PROVEN IN THREE WARS

KNIVES FOR MILITARY MEN AND PROFESSIONAL ADVENTURERS

SUPPLIERS TO AMERICAN MILITARY MEN IN ALL BRANCHES OF THE ARMED FORCES

COMBAT . . . THE ULTIMATE TEST OF A KNIFE

Since 1941, Ek Commando Knives have proven themselves on the battlefields of World War II, Korea and Vietnam. They hold the record for being the leading private-purchase military knives in American history.

Professional military men who need a knife they can trust continue to turn to us for battle-proven knives—a tradition which began in 1941.

These are no-nonsense knives—strong, tough and shaving sharp. As John Ek said in 1941, "A good knife can save a life." With this important philosophy, Ek Commando Knives have always been based on rugged designs, quality materials and handcraftsmanship. That's why Ek holds the record for being the leading private-purchase military knife in American history. So, if you're

"I carried one of your Style #1 knives during my tour in Southeast Asia . . . It was a fine tool, and was used by me for everything from opening C-rations to saving my skin late one night."

J.A.W.

looking for America's finest military knives, you've come to the right place.

What Should I Look For When Buying a Knife?

At a time when many new "combat" and "survival" knives are available, none of

them have been tested—and proven—where it counts. In fact, when the chips are down, some may cost you your life—a high price to pay for having the wrong knife. That's why professional military men—whose very lives can depend on their knives—seek out battle-proven knives.

Any knifemaker can make idle claims. And most do. But look for a knife with proven ability. Preferably one that is **battle proven**.

In a World of Compromise, Ek Commando Knives Don't

"Who has tested our knives?" Our proud reply: "Over one hundred thousand American Soldiers, Marines, Airmen and Sailors!" With 50 years of advice and design assistance from combat veterans, Ek Com-

"The men here in Vietnam consider your knives far superior to anything else in knives."

Captain M.P. (1967)

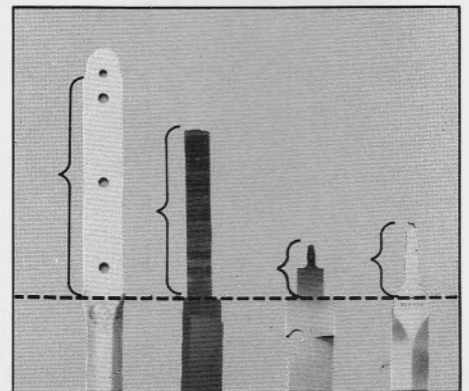

mando Knives have arrived at a level of technology beyond that of other production knives. State-of-the-art materials such as the specially-developed HCS1718 high-carbon stainless steel and the finest high components complement the basic, time-tested design.

Be it a military maneuver in distant lands, a SWAT operation in the streets or a hunting trip in the wilderness, if your knife doesn't survive, you might not either. Other

knives may be satisfactory under normal circumstances—Ek Knives are designed for when your life depends on it.

More Steel Than Any Other Knife of Their Size and Type

When you acquire an Ek Commando Knife, you're not throwing your money

The main strength—or weakness—of a knife is revealed when the grip is removed. Compare the full tang of the Ek (L) to the smaller "stub" tangs of the other well-known, yet weaker, knives.

away on gimmicks. You're investing in steel and skilled American handcraftsmanship. **We make our knives with more steel than any other knife of their size and type.** They feature a full-length, full-width tang. That's a solid bar of steel running through the grips, which is unmatched for strength. Most other knives have a short "stub" tang or a narrow "rat-tail" tang that can break. Worse yet, knives that have no

tang at all—the blade is simply pinned or welded to the grip in a joint which can fail when you least expect it, and when you need your knife the most.

With the Ek full-length, full-width tang, you can take off one or both of the grips and still have a one-inch by five and one-half inch solid bar of steel—still a handful of handle.

"On October, 1967, at Bien Hoa in III Corps, I was in a gunship flying an insert mission . . . we took beaucoup hits from a .51-caliber and the ship went down . . . I took my Ek Commando Knife (issued to me by MACV-SOG) and pounded on the door. No good. So, I jammed the knife through the metal skin and cut my way out. The knife cut it like butter. The hole was big enough to get out—over two feet across. The Charlies didn't see us—the only weapon we had was the Ek Knife.

"We both made it through 23 clicks of jungle with a knife as protection. We had to dispose of two VC with it. Again, it did the job, never losing its edge. Without that knife, we both would be dead.

"I have opened C-rat cans with it, cut ammo cans open, cut parachute webbing with it, pounded nails and chopped tree limbs with it. I have busted Ka-bars doing the same jobs.

"In July, 1970, I dropped HALO into a bad LZ, lost our equipment, and I busted my stock on my Matty Matel M-16. Again, the knife and a 9mm is all I had.

"I had only two clips of 13 each ammo. Some VC regulars rushed us and I went low on ammo. That damn, beautiful knife took three of them out, one stroke each. We got back to base camp and we made it because of the knife.

I am a very firm believer that you have the finest knife in the world today . . . the U.S. Army (should) get one for every soldier to use."

Master Sergeant J.P., Special Forces

Customize Your Own Full-Tang Ek Grip System

Ek Commando Knives use two sophisticated grip systems. With the first, you get three solid brass, custom machine-turned fittings which are removable for cleaning or replacement. At a time when other knives typically use just two fasteners, Ek uses three. It's a little more expensive, but if one should ever become loose (unlikely), you've got two others to keep it from wobbling. When you start out with only two fasteners, and one becomes loose, you get a

In November 1943, men of the 306th Fighter Control Squadron inspect and test John Ek Commando Knives.

loose grip right away. Just look in your kitchen knife drawer.

Another grip option is the unique Ek Paragrip™ which is 18 feet of military-specification, 550-pound tensile strength parachute cord. The Ek Paragrip™ provides a tough, non-slip grip which can be easily unwrapped and rewrapped. Originated and developed by Ek years ago, these days this grip system is often copied by other knifemakers.

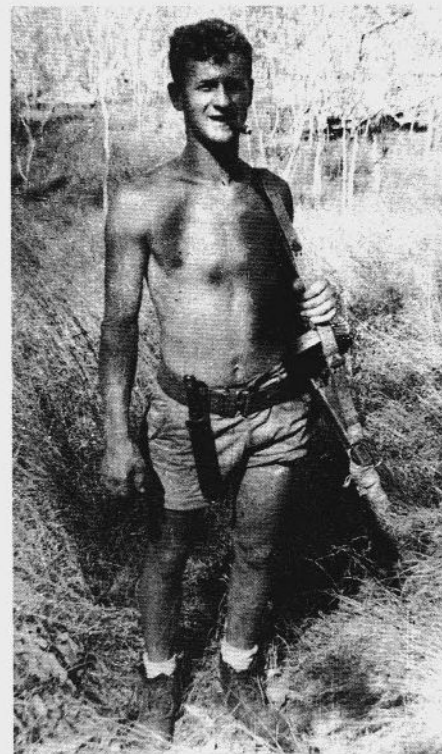

Ek also provides a variety of sheath options. The high-quality olive drab nylon

cord for utility or emergency tie down. If you prefer another sheath combination, you may substitute either the black web sheath, or the black or brown deluxe leather sheath which features dual leather, velcro-backed retaining straps and 20 additional feet of specially-wrapped p-cord. All Ek sheaths will fit wide military belts, and all are handmade in America.

Proven in World War II, Korea and Vietnam

You don't find these things out easily. You find them out on the toughest proving grounds of the world—the battlefields of World War II, Korea and Vietnam. The people who test them are American military men—men who know knives. It's features like these that have earned our knives the proud title: "America's Finest Military Knives."

So, when the chips are down and your life is on the line, you can be a "field tester"

New Guinea, 1943

web sheath, automatically included with virtually every Ek Knife, is nylon lock stitched, fitted with rivets for extra strength and wrapped with six additional feet of p-

for one of the other makers—or you can go with a battle-proven knife made to save your life.

The knife you choose says a lot about your personal pride. Choose a no-nonsense knife that has been battle-proven by Americans. Choose an Ek.

A FEW UNSOLICITED TESTIMONIALS

Dear Ek: I am a Paratrooper with the 82nd Airborne Division presently deployed to Saudi Arabia. My current tool, a Marine Corps K-Bar, was rendered useless by an air-dropped crate of ammo and supplies in the Saudi desert. Another Paratrooper seeing the predicament I was in rushed to the rescue . . . with a wave of his arm he presented the object he referred to as his "Ek Warrior" . . . this piece of professional steel completed the job post-hast! I will make it a point to make a stop at the nearest knife store upon my return to the States for one of these fine pieces of quality workmanship. Keep up the tradition! - Sgt. TG

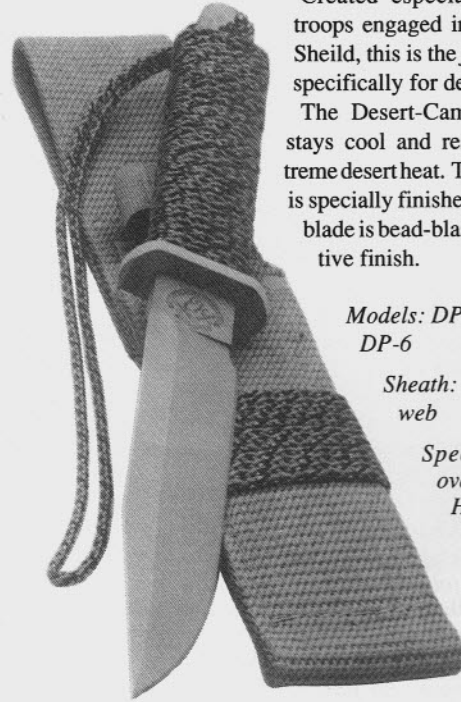

Dear Ek: Since receiving the Ek Knife and o.d. nylon web sheath I have dressed a deer and elk—and it still has not needed resharping. What a piece of steel! - J.O.

Dear Ek: I am an owner of an Ek Warrior and I'm writing to thank you for making such a knife. It is truly an Ek made with the user in mind. A solid, sturdy knife that is not afraid to get a little dirty. - M.M.

Dear Ek: I recently purchased an Ek Bowie with a micarta grip. I want to say I am absolutely delighted. I have owned a number of knives over the past 20 years, and all others have seemed too big, too small, too hard to sharpen, too easy to dull, etc. Not so with this Bowie. It is just the right weight, fits my hand fine, is sturdy, artistic and perfectly balanced. - C.K.

Ek "DESERT PATROL" KNIFE

NEW

Created especially for American troops engaged in Operation Desert Shield, this is the *first* knife designed specifically for desert warfare.

The Desert-Camo Ek *Paragrip*™ stays cool and resilient even in extreme desert heat. The brass crossguard is specially finished in desert tan. The blade is bead-blasted to a non-reflective finish.

Models: DP-3, DP-4, DP-5 and DP-6

Sheath: Desert-tan nylon web

Specifications: 13" overall, 6-7/8" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. DP-6 shown.

"SURVIVAL/FIGHTER"

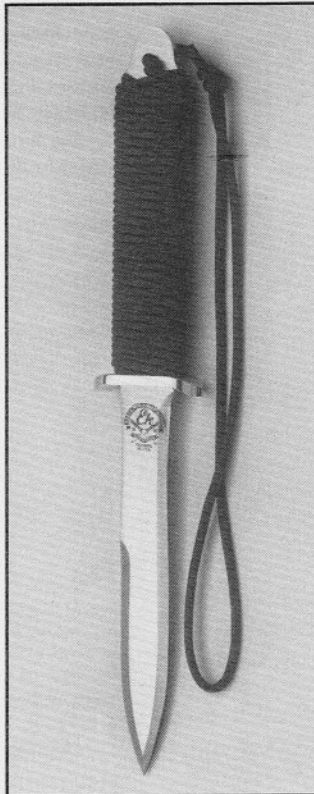

The "Survival/Fighter" is a best-seller in the current-production Ek Commando Knife line. As the first Ek *Paragrip*™ Model, it is a modern classic among military fighting knives.

The olive drab Ek *Paragrip*™ is designed for military use, but it is also popular among civilian adventurers and outdoorsmen.

Models: S/F-3, S/F-4, S/F-5 and S/F-6

Sheath: Olive drab nylon web

Specifications: 13" overall, 6-7/8" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. S/F-3 shown.

"JUNGLE PATROL"

NEW

Based on a customized Ek Knife requested by Special Forces troops, the mission-tailored Ek "Jungle Patrol" Knife is now available on a standard production basis.

The Ek *Paragrip*™ is 18" of camouflage parachute cord custom made to military specification expressly for this knife. The brass crossguard is specially blackened; the blade is bead-blasted to a non-reflective finish.

Models: JP-3, JP-4, JP-5 and JP-6

Sheath: Olive drab nylon web

Specifications: 13" overall, 6-7/8" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. JP-3 shown.

“SWAT”

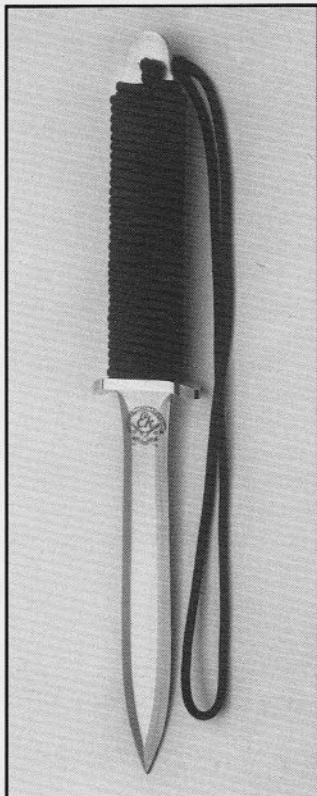

The Ek “SWAT” Model was developed by and for law enforcement professionals, yet it is popular among military personnel and civilians, as well.

The Ek *Paragrip*™ is 18' of midnight black 550 lb. tensile-strength military specification parachute cord. If you wish, for an additional fee, the Ek Custom Shop (page 10) will also specially blacken the crossguard and blade for an “all-black” knife ideal for night maneuvers.

Models: SWAT-3, SWAT-4, SWAT-5 and SWAT-6

Sheath: Black nylon web

Specifications: 13" overall, 6-7/8" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. SWAT-4 shown.

“GUNNER”

The Ek “Gunner” Model is the first knife in the world with gunstock grips. It was created for the traditionalist—men who appreciate the natural beauty of guns with hand chequered wood stocks.

Each “Gunner” is individually handbuilt for a perfect wood-to-metal fit. The deluxe American walnut grips are hand cut and chequered by the respected gunstock craftsmen of Herrett’s Stocks.

Models: G-3, G-4, G-5 and G-6

Sheath: Olive drab nylon web

Specifications: 13" overall, 6-7/8" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. G-4 shown.

“AMERICAN OAK”

This model features smooth hand-finished oak grips, without the V-Grooves or chequering of the “M-Series” or “Gunner” Model Ek Commando Knives.

And, since these grips are smooth, if you choose, you can customize your knife at home—file, chisel, sand and re-finish your grips yourself, just the way you like them.

Models: Oak-3, Oak-4, Oak-5 and Oak-6

Sheath: Olive drab nylon web

Specifications: 13" overall, 6-7/8" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. Oak-5 shown.

“M-SERIES”

The “M-Series” Ek Commando Knives are the best-selling models in the line today, due in part to the popularity of Micarta, a state-of-the-art hilt material made from pressed, resin-impregnated linen.

Ek *Handprint*™ grips are contoured to fit the ball of the hand and thumb position perfectly. V-Grooves are cut perpendicular to the thrust axis of the knife for a non-slip grip.

Models: M-3, M-4, M-5 and M-6

Sheath: Specify olive drab or black nylon web

Specifications: 13" overall, 6-7/8" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. M-5 shown.

“SECRET AGENT” BOOT KNIFE

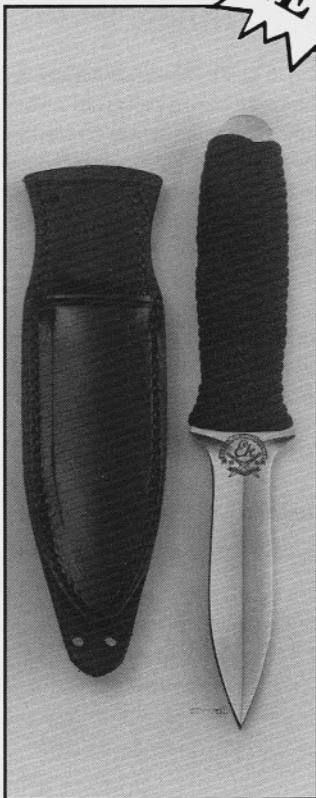

The all-new Ek “Secret Agent” Boot Knife is compact, yet the ergonomic hilt design allows it to fit in your hand just right.

The full-width, full-length double-edge blade design makes this boot-style knife stronger than any other in its category. A high-quality black leather sheath with metal clip and tie-down tab is automatically included. If you choose, a black nylon-web leg and arm sheath is available (page 10).

Model: AGENT BOOT

Sheath: Black leather

Specifications: 7-1/2" overall, 3-1/2" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. AGENT BOOT.

“DESERT PATROL, JR.” BOOT KNIFE

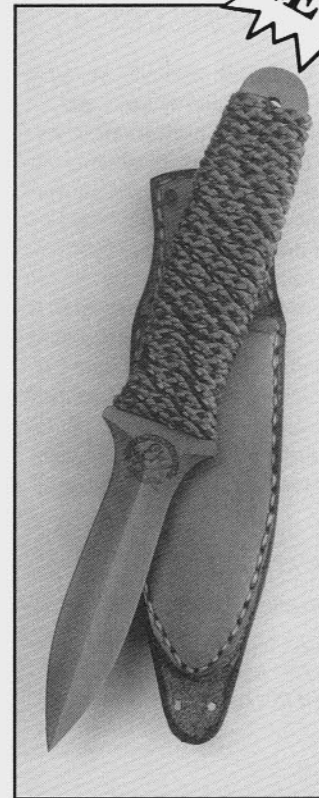

American military involvement in the Middle East creates a dramatic need for troops and equipment prepared for an unusual mission—*desert* warfare. Now, Ek brings you the first boot-style knife designed for desert warfare, the “Desert Patrol, Jr.” Boot Knife.

The steel is specially bead-blasted to a non-glare finish and wrapped with six feet of Desert-Camo paracord. A tan leather sheath is automatically included (desert-tan nylon-web leg and arm sheath also available on page 10).

Model: DESERT BOOT

Sheath: Tan leather

Specifications: 7-1/2" overall, 3-1/2" blade, HCS1718 steel and Rockwell C57-59 hardness.

Model No. DESERT BOOT.

“WARRIOR”

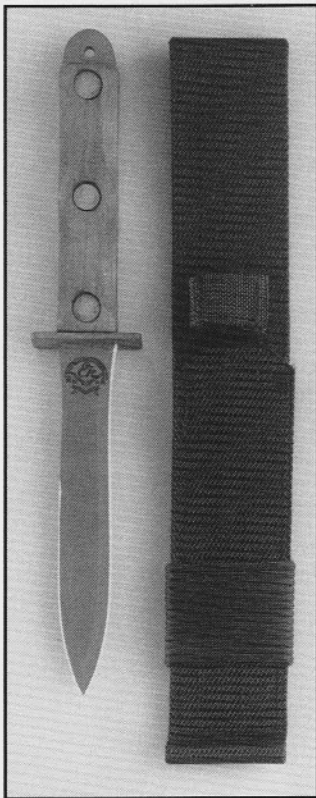

If you're looking for a rugged, lower-priced knife, but you don't want to sacrifice quality, performance or battle-proven ability—choose the Ek “Warrior.”

Features: maple grips, three British Ministry of Defense copper rivets, steel crossguard and bead-blasted commando-style blade.

Model: WAR

Sheath: Olive drab nylon web

Specifications: 12-1/2" overall, 6-5/8" blade, high-carbon stainless steel, Rockwell C57 hardness.

Model No. WAR.

“DESERT WARRIOR”

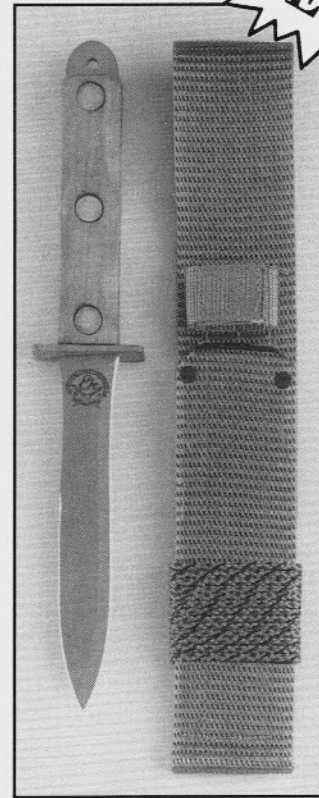

Since 1941, and through three major wars, American Soldiers, Sailors, Marines and Airmen continue to turn to Ek for a knife with battle proven ability. One big reason: Ek is famous for its ability to “mission tailor” a fighting knife to meet the job at hand.

Now, Ek brings you the *desert* version of the no-nonsense “Warrior” Model, at the special request of American military troops engaged in Operation Desert Shield.

Model: DESERT WAR

Sheath: Desert-tan nylon web

Specifications: 12-1/2" overall, 6-5/8" blade, high-carbon stainless steel, Rockwell C57 hardness.

Model No. DESERT WAR.

**“AUSTRALIAN
COMMANDO”**

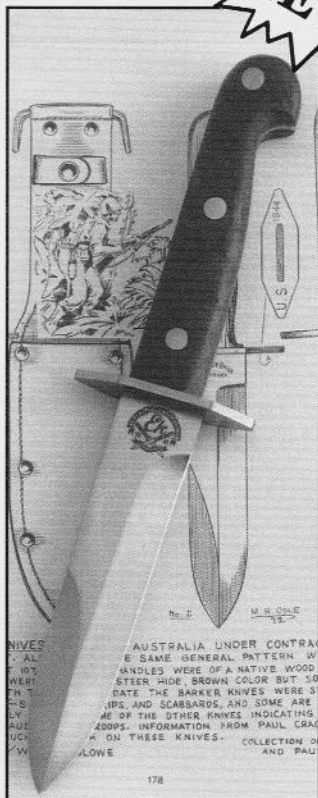

The Ek “Australian Com-
mando” Knife is patterned after
the fighting knife made in
Australia for American service-
men during World War II.

This version, as a fighting
knife, or as a field and camp
knife, is even more rugged and
battleworthy than the originals.
One solid piece of steel runs
from point to butt. The walnut
grips are fit flush to the tang
and steel crossguard, contoured
to fit the hand perfectly and
finished to bring out their
natural beauty.

Model: AUSTRALIAN

Sheath: Deluxe brown leather

*Specifications: 11" overall,
5-3/4" blade, HCS1718 steel
and Rockwell C57-59 hardness.*

Model No. AUSTRALIAN.

**“DELUXE 50”
AND
“DELUXE 150”**

In honor of the Ek Commando Knife Company’s “1941-1991
Golden Anniversary”, the Ek Custom Shop is issuing two serially-
numbered limited edition knives, exclusively for members of the Ek
Collector’s Club.

Reservers of the “Deluxe 150” have the first opportunity to
acquire the “Deluxe 50,” and with matching serial numbers, if they
choose.

The “Deluxe 50” is a limited edition of *only* 50 presentation-
grade Ek Knives with selective gold-plated and etched inscriptions
on a mirror-polished Ek Bowie blade, stag grips and hand-engraved
and gold-plated crossguard and fasteners.

The “Deluxe 150” is a limited edition of *only* 150 Ek Knives,
each with a mirror polished commando-style blade, deluxe
chequered walnut grips and hand-engraved and gold-plated
crossguard and fasteners.

The “official announcement” for both limited edition “Golden
Anniversary” Ek Commando Knives will be in an Ek Collector’s
Club membership mailing scheduled for February 1991.

Models: DELUXE 50 and DELUXE 150

Accessories: Walnut display case and Letter of Authenticity

*Specifications: 13" overall, 6-7/8" blade, HCS1718 steel, Rockwell
C57-59 hardness and 24-Karat Gold.*

**“PROFESSIONAL
THROWER”**

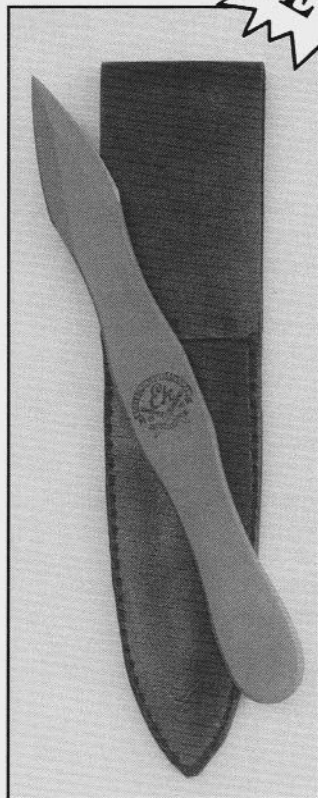

The new Ek “Professional”
Throwing Knife features two
sets of classic Ek “scallop”
along the blade length, and a
point which is, in John Ek’s
words, borrowed from the
“arrowhead design proven by
American Indians.”

Ek “Professional” Throwing
Knives are available individu-
ally (with single-knife sheath)
and in sets of three (with three-
knife sheath).

*Model: THROWER/SINGLE
and THROWER/SET*

Sheath: Black leather

*Specifications: 10" overall,
3/8" thick, bead-blasted high-
carbon stainless steel and
Rockwell C55 hardness.*

Model No. THROWER/SINGLE shown.

“GENUINE STAG”

For display, or for actual
use, the top-of-the-line Ek
“Genuine Stag” Model is for
men who love the beauty and
feel of real stag—and don’t
mind paying for it.

No two Ek “Genuine Stag”
Knives are exactly alike. Each
heirloom-quality stag-handled
knife is custom built to order,
and by the senior knifsmith in
the Ek Custom Shop. Please
allow six to eight weeks for
delivery.

*Models: STAG-3, STAG-4,
STAG-5 and STAG-6*

Sheath: Olive drab nylon web

*Specifications: 13" overall,
6-7/8" blade, HCS1718 steel,
Rockwell C57-59 and imported
India stag.*

Model No. STAG-5 shown.

H.G. LONG & CO. SHEFFIELD, ENGLAND

Adding to any knife's appeal and historical significance is the fact that it comes to you from H.G. Long & Co..

Established in 1846, H.G. Long & Co. is one of England's most prestigious knifemaking firms, with a rich tradition of excellence in the making of fighting knives for front-line troops.

Through its work with the old-line H.G. Long craftsmen, the Ek Commando Knife Company is able to bring knife collectors and enthusiasts worldwide the opportunity to acquire high-quality military knife reproductions. Some are the most historic and interesting Allied military edged weapons ever created.

In addition, Ek and H.G. Long provide collectors with opportunities to own examples of drop-forged blades, hand-fitted hilts and other traditional, expensive features rarely employed by "modern" knifemaking companies.

The Ek Commando Knife Company, America's leading supplier of private-purchase military knives, is proud of its appointment as the exclusive worldwide distributor of military knives made by the skilled craftsmen of H.G. Long & Co., in Sheffield, England.

"OSS/SOE SLEEVE DAGGER"

The OSS/SOE Sleeve Dagger is right out of the pages of James Bond. It was originally created during World War II for the American Office of Strategic Services and the British Special Operations Executive. Today it is one of the most valuable edged weapons in the field of military collecting.

The blade's cross section is ground triangular, with fullers (or blood grooves) in each of the three blade flats. Concealed by the shirt sleeve, the sheath is double-strapped to the arm on the underside of the wrist.

Model: DAGGER

Sheath: Brown leather

Specifications: 7" overall with 3-1/2" blade; carbon steel.

Model No. DAGGER

"V-42 STILETTO"

Designed during World War II for the First Special Service Force, the V-42 Stiletto is the most sought after knife in the field of historic military edged weapons. No collection is complete without one.

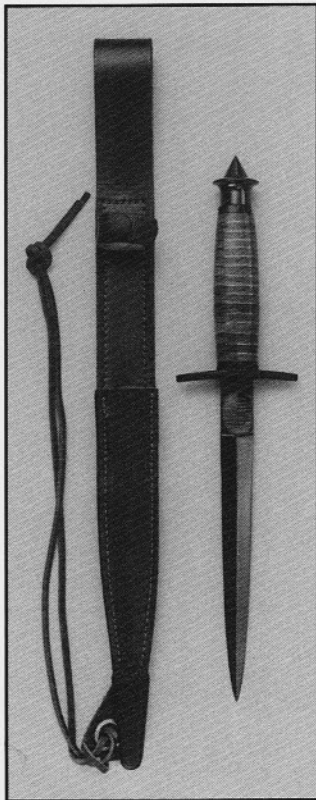

The V-42 features a "skullcrusher" pommel, leather grip, "thumb print" ricasso, gun-blued blade and a stiletto-sharp point.

The distinctive 16-1/2" sheath is one of the longest ever developed for a knife.

Model: V-42

Sheath: Brown leather

Specifications: 12-1/2" overall; 7-1/4" carbon steel blade.

Model No. V-42.

"FAIRBAIRN-SYKES FIGHTING KNIFE"

The Fairbairn-Sykes Fighting Knife is an arms collecting "classic" which many experts consider the single most important fighting knife design of the 20th century.

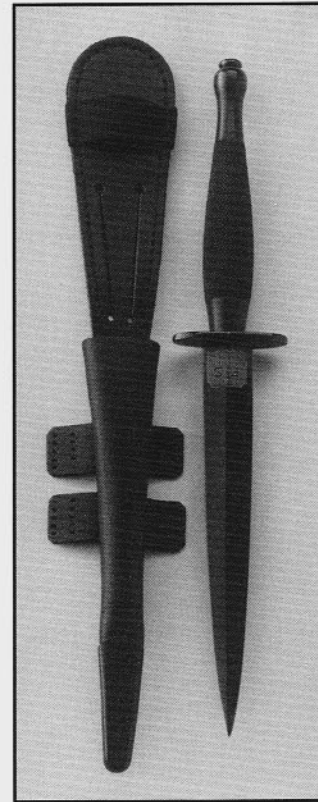

Of particular interest on this authentic reproduction is the fact that it features the distinctive, solid brass "knurled" hilt found only on the earliest models.

Do not confuse this Fairbairn-Sykes with those cheap imports you see advertised! This version is a museum-quality—yet battle-worthy—fighting knife.

Model: F-S

Sheath: Brown leather

Specifications: 12" overall with 7" blade; carbon steel.

Model No. F-S.

“OSS/SOE MINIATURE DAGGERS”

These World War II miniature clandestine operation emergency knives are authentic, fascinating examples of equipment from the world of intrigue. Both the “Lapel Dagger” and the “Thumb Dagger” are fitted into special

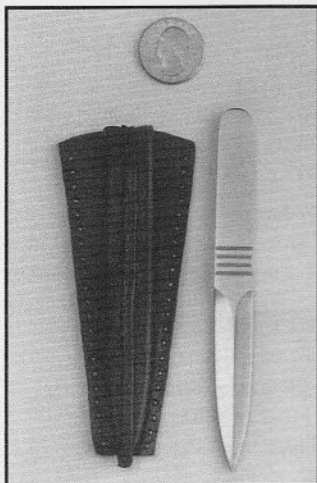

sheaths so they could easily be sewn behind the coat lapel or concealed in clothing seams, with little risk of being detected during a hurried frisk.

The blades are of a diamond cross-section design with grooves in the base to provide gripping power for the thumb and forefinger.

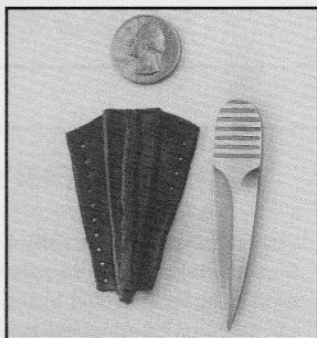

Models: LAPEL and THUMB

Sheath: Brown leather

Specifications: stainless steel

Model No. LAPEL is 5" long.

Model No. THUMB is 3-1/2" long.

“U.S. MARINE RAIDER STILETTO”

A 1943 song described the U.S. Marine Raiders well: “They carried machine guns like pistols, and a knife that was tempered in Hell!” That knife? The Marine Raider Stiletto.

This is the first and only field-grade version ever officially authorized by the U.S. Marine Raider Association. The chequered pewter hilt is cast directly onto the tang of the blade, making this knife one inseparable unit. Also included: original leather sheath, an embroidered Raider patch and a Letter of Authenticity from the U.S. Marine Raider Association.

Model: RAIDER STILETTO

Sheath: Brown leather

Specifications: 12" overall, 7" blade; stainless steel.

Model No. RAIDER STILETTO

“BC-41”

By far the rarest and most interesting “early-issue” (ie: prior to the Fairbairn-Sykes) British Commando knives is the BC-41 Fighting Knife. Simply put, the ultra-exotic BC-41 was designed as a single-purpose raider’s knife inspired by the trench knives of World War I fame.

The “knuckle duster” hilt is cast of brass, with sharp points on the punching edge and a recessed groove on the reverse side in which the blade is affixed.

Model: BC-41

Sheath: Brown leather

Specifications: 8-1/2" overall, 5-1/2" blade; carbon steel.

Model No. BC-41.

“PARACHUTIST SLEEVE & LEG SCABBARD”

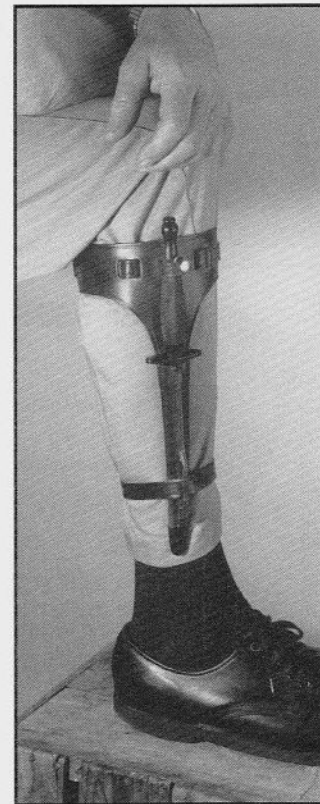

One of the most unusual scabbards made during World War II was the Parachutist Scabbard designed to be worn on the forearm or leg. Today, it is generally associated with British and Canadian paratroopers, as well as British, French and Belgian SAS units.

This high-quality reproduction may be ordered as an accessory to fit your Fairbairn-Sykes Fighting Knife, V-42 Stiletto, Marine Raider Stiletto or virtually any other stiletto-type knife of similar size and style.

Model: F-S PARASHEATH

Note: Knife not included

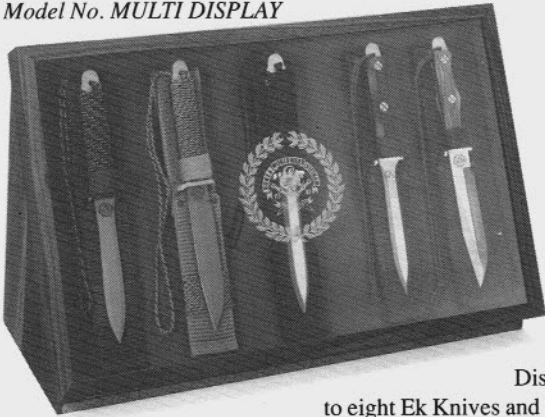

Specifications: Brown leather with metal chape.

Model No. F-S PARASHEATH Fits Sleeve or Leg.

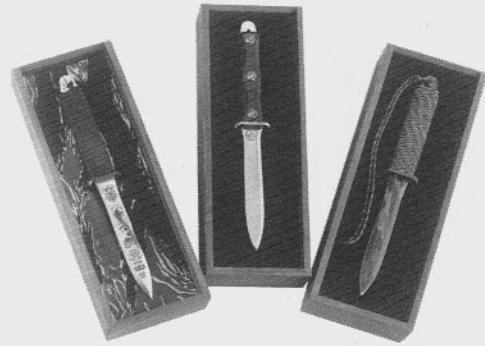

Ek MULTI-KNIFE LOCKABLE DISPLAY

Model No. MULTI DISPLAY

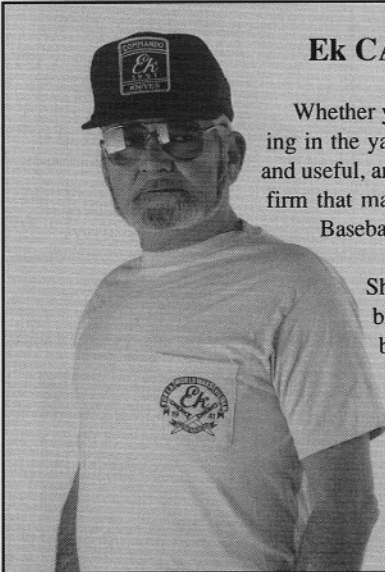

Display up to eight Ek Knives and sheaths, on a countertop, table or shelf. Store extra knives inside. Hardwood with reverse-painted glass. 25" x 16" x 11"

Ek INDIVIDUAL-KNIFE DISPLAY

Custom made of furniture-finished walnut, with sliding acrylic-glass lid. Suitable for wall, shelf or table display. Specify color of velvet: black, maroon, olive drab or camouflage. 15" x 5-1/2" x 2-1/4". Model No. INDIVID DISPLAY

Ek CAP & T-SHIRT

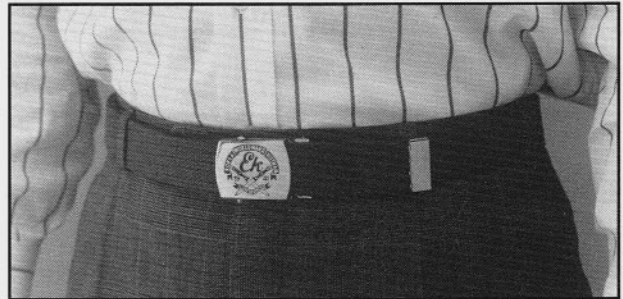

Whether you're in the field or working in the yard, the Ek Cap is handsome and useful, and it's handsewn by the same firm that makes them for Major League Baseball. One adjustable size in navy.

The 100% cotton Ek T-Shirt is light gray with navy blue print on front pocket and back. Back reads "America's Finest Military Knives . . . Battle Proven in Three Wars, above the World War II, Korea and Vietnam service medals. Specify large or extra large.

Model No. CAP and T-SHIRT

Ek MILITARY-STYLE BELT

Practical, 100%-cotton, navy-blue Ek trouser belts are popular for everyday wear. Military-style 1-1/4" width is fitted with a solid brass tip and roller buckle. Supplied in 46" length which can easily be cut for any waist size.
