

## Super-hard High Speed Tool Steel Blades with nonslip Armorhide® Handles

Gerber hunting blades are handcrafted from a special high speed tool steel that cuts other steel. No other knife maker uses steel that even approaches the quality of steel used in these blades. Fully 18% of the total weight of Gerber High Speed Tool Steel is tungsten, molybdenum, vanadium, chromium and carbon. It is the only steel produced by modern metallurgy that has durable springiness required for practical knife blades and a super hardness of Rockwell C60-62. It has exceptional wear resistance and holds a keen cutting edge better than any other knife steel.

The blade is ground to a straight, double wedge shape that provides the strongest practical cutting edge.

The surface of the Gerber High Speed Tool Steel blade is given a special hard chrome plating that keeps the blade permanently bright and stainless. High speed tool steel is exposed only along the final cutting edge. Keep this fine cutting edge clean and dry between uses. If rust should start, a quick honing will remove it.

The graceful, functional, comfortable handle is solid aluminum alloy cast directly onto the notched tang of the blade. Handle and blade become forever one piece. No rivets, bolts or screws. No seams to collect dirt. No possibility of handle coming loose, breaking or separating from the blade.

Ebony Armorhide®, a ground thermo setting vinyl material, is permanently fused to the handle. This amazing non-slip surface makes it possible to hold the knife firmly in your grip, even when your hand is wet or slippery. It will not chip or peel.

Molded strap leather belt scabbards of handsome design are supplied with Gerber hunting knives. These superior quality scabbards are handcrafted for the specific blades they carry. Scabbards for the Magnum Hunter and Big Hunter have molded plastic liners for extra safety and durability.

### Mg/Magnum Hunter

Heavy duty hunting knife with heavy duty blade.

Blade length: 5½"  
Blade thickness: .125"  
Overall length: 11"  
**\$22.50**

### Bh/Big Hunter

Big knife for hunting and camping chores.

Blade length: 5½"  
Blade thickness: .100"  
Overall length: 11"  
**\$18.50**

### Sh/Shorty

All-round utility knife for hunting and camping.

Blade length: 4½"  
Blade thickness: .088"  
Overall length: 8¼"  
**\$12.50**

### Fl/Flayer

Wide blade specially designed for skinning out game.

Blade length: 4"  
Blade thickness: .062"  
Overall length: 8¾"  
**\$11.95**

### Mi/Mini-Magnum

Compact all-purpose hunting and camping knife.

Blade length: 4"  
Blade thickness: .062"  
Overall length: 8¾"  
**\$11.50**

### P/Pixie

Small, versatile knife for hunters, fishermen, campers.

Blade length: 3"  
Blade thickness: .050"  
Overall length: 7"  
**\$7.50**

### MkII/Mark II Survival Knife

Double edged blade for defense and emergency survival.

Blade length: 6¾"  
Blade thickness: .058"  
Overall length: 12"  
**\$27.50**

MARK II SURVIVAL KNIFE is handcrafted from a special alloy tool steel selected for its combination of toughness and shock resistance with special qualities to take and hold a superior cutting edge. It has a hardness of Rockwell C58. This blade is not chrome plated and can be treated with bluing solution to produce a dull surface like that on a rifle for camouflage purposes if desired. It should be kept clean and lightly oiled. The oiled cowhide saddle leather scabbard is equipped with temporary steel hanger for attaching to a regulation web field belt and a slot for wear on a regular belt. A .36" leather thong ties the scabbard to the leg.

## Gerber Sportsman's Combo Sets

KNIFE SETS in special belt scabbard team the versatile Pixie with a larger hunting blade to provide the right knife for every camp cutting chore.

- Mg & P/Magnum & Pixie **\$30.00**
- Bh & P/Big Hunter & Pixie **\$26.00**
- Sh & P/Shorty & Pixie **\$20.00**
- Fl & P/Flayer & Pixie **\$19.50**
- Mi & P/Mini-Magnum & Pixie **\$19.00**

KNIFE & SHARPENING STEEL SETS in special belt scabbard team a hunting knife with the handy Sportsman's Steel for touching up the blade edge, and for hacking, splitting and scraping jobs unsuitable for a knife.

- Mg & St/Magnum & Steel **\$30.00**
- Bh & St/Big Hunter & Steel **\$26.00**
- Sh & St/Shorty & Steel **\$20.00**
- Fl & St/Flayer & Steel **\$19.50**
- Mi & St/Mini-Magnum & Steel **\$19.00**
- MkII & St/Mark II & Steel **\$35.00**

## Corrosion Resistant Blades With Non-slip Armohide® Handles

Gerber fishing blades are handcrafted from Gerber 440C Stainless, a super hard and tough steel that has high chromium and carbon content. This alloy is specially suited for fishing knives because it resists rust and corrosion. It withstands prolonged exposure to moisture that stains and dulls ordinary cutlery steel and even the finest tool steel. It is specially heat treated and tempered to a hardness of Rockwell C57-59, just a few points lower than Gerber High Speed Tool Steel.

The non-slip Armohide® surface on the solid cast aluminum alloy handles is ideal for fishing knives because it makes it possible to hold these knives firmly, even when your hand is wet and slimy.

Two of the Gerber fishing knives have built-in spoons on handle butts for stripping out the blood sac along the backbone of handle.

Molded strap leather belt scabbards of handsome design and superior quality are supplied with Gerber fishing knives.

### Tb/Trout & Bird

Specially designed for cleaning small fish and game birds. Stripping spoon on butt of handle.

Blade length—3¼"  
Blade thickness—.050"  
Overall length—8½"

**\$8.50**

### Co/Coho

Specially designed for cleaning and filleting larger fish such as salmon and steelhead. Stripping spoon on butt of handle.

Blade length—6"  
Blade thickness—.062"  
Overall length—11¼"

**\$11.95**

### Mu/Muskie

Designed for boning and filleting fish.

Blade length—6"  
Blade thickness—.062"  
Overall length—11¼"

**\$11.95**

## A word about sharpening knives

A sharp knife is far easier and safer to use. It cuts where it is meant to cut without forcing. Occasional touch-up with the right sharpening tools enables the user to obtain continuous full performance from superior quality Gerber Blades.

Periodic light "steeling" when the edge is only a shade less than razor sharp will keep a Gerber Blade in top condition. The Gerber Sportsman's Steel has a chromium carbide surface—the only steel hard enough to whet a Gerber High Speed Tool Steel Blade. Two Gerber sharpening stones are also available.

### St/SPORTSMAN'S STEEL

Length—5"  
Width—1½"  
Thickness—¼"

**\$7.50**

### GERBER SPORTSMAN'S STEEL

The chromium carbide surface of the Sportsman's Steel is specially suited for keeping Gerber hunting and fishing knives in top shape. The chisel point can be used for hacking, prying, splitting, scraping and other jobs unsuitable for a knife. Supplied with strap leather belt scabbard. (Also supplied in Sportsman's Combo Sets listed on opposite side of this sheet.)

### GERBER SILICON CARBIDE STONE (Oil Impregnated)

Si  
SILICON  
CARBIDE  
STONE  
Length—8"  
Width—2"  
Thickness—1"  
**\$9.95**

Use to remove nicks or pits and re-establish proper cutting edge. The tool to start with if an edge is really dull. Coarse on one side, fine on the other. Supplied in handsome walnut box.

### GERBER HARD ARKANSAS STONE

Ar  
HARD  
ARKANSAS  
STONE  
Length—8"  
Width—1½"  
Thickness—½"  
**\$6.50**

Use with light mineral oil or water for a final honing if you want the smoothest edge.

## GERBER FOLDING HUNTER Brawny and Beautiful

Superior in design, safety and performance. The 4" blade is specially shaped with a sharp point to handle ordinary hunting, fishing and camping chores, yet has a broad taper for skinning. It is ground to a straight, double wedge shape that provides a strong cutting edge.

The blade locks firmly in open position and won't jiggle or break away under roughest use, yet closes safely for carrying in the compact strap leather belt scabbard. A recessed thumb latch at the back of the handle unlocks the blade which then closes naturally, stopping at ¾-closed position to fold smoothly into the handle. The blade won't spring shut to endanger fingers.

The power grip handle is shaped to provide a sure, non-slip grip. It fits comfortably in either hand.

## Choice of Two Blade Steels

**High Speed Tool Steel** blades handcrafted from special high speed tool steel and plated so the super hard high alloy steel is exposed only along the final cutting edge.

**440C Stainless** blades handcrafted from rust and corrosion resistant steel that has chromium and

carbon content. They withstand prolonged exposure to moisture that stains and dulls ordinary cutlery steel and even finest tool steel.

## Choice of handles

**Solid Delrin®**, a tough, shatter-proof acetal resin that stands up under rough treatment and is textured for a firm grip.

**Solid walnut** with matched grain, finished with tung oil and silicone which brings out the beauty of the grain and protects the handle from moisture.

**Hand-checked walnut** that has the handsome character and beauty of the finest custom-made rifle stock. A durable tung oil and silicone

finish brings out the beauty of the matched grain and protects the handle from moisture.

## Fh/Folding Hunter

Blade length—4"  
Blade thickness—100"  
Overall length, open—8½"  
closed—5"

### Delrin® Handle

High Speed Tool Steel Blade **\$18.95**  
440C Stainless Blade **\$16.95**

### Walnut Handle

High Speed Tool Steel Blade **\$21.95**  
440C Stainless Blade **\$19.95**

### Hand-Checked Walnut Handle

High Speed Tool Steel Blade **\$23.95**  
440C Stainless Blade **\$21.95**

**Gerber Folding Hunter Combo Set** Folding Hunter teamed in special belt scabbard with the handy Sportsman's Steel for touching up the blade edge and for hacking, splitting and scraping jobs unsuitable for a knife.

### Delrin® Handle

High Speed Tool Steel Blade & Steel **\$26.50**  
440C Stainless Blade & Steel **\$24.50**

### Walnut Handle

High Speed Tool Steel Blade & Steel **\$29.50**  
440C Stainless Blade & Steel **\$27.50**

### Hand-Checked Walnut Handle

High Speed Tool Steel Blade & Steel **\$31.50**  
440C Stainless Blade & Steel **\$29.50**
